MOAUM Unified University Portal — User Manual

Volume 01 of the documentation package · Rev. Fr. Moses Orshio Adasu University, Makurdi · Directorate of ICT

This volume is for the people who use the portal without administering it: students (undergraduate and postgraduate), applicants (undergraduate and postgraduate), lecturers, external examiners and the general staff who hold an office on the portal — Head of Department, Dean, Examinations Officer, Faculty Examinations Officer, Faculty Officer, SIWES Coordinator, Librarian, Chief Security Officer and Support Services. It describes only what the portal does today. Where a screen, button or message is unfinished, this manual says so with a call-out rather than describing it as complete. Administrators should read *02 Administrator Manual*; developers *03 Technical Documentation*; anyone checking who may do what, *04 Role & Permission Matrix*.

1 Introduction and about the portal

1.1 What the portal is

The MOAUM Unified University Portal is the single web application of Rev. Fr. Moses Orshio Adasu University, Makurdi (formerly Benue State University). It holds the University's registers — applicants, students, staff, courses, fees, results, accommodation, documents — and lets each person act on the part of the register that is theirs. A student registers courses, pays fees, reads results and asks for a transcript on it; a lecturer enters marks on it; a Head of Department approves registrations and allocates teaching on it; the Registry matriculates on it.

Three principles show through every screen, and it helps to know them:

- **Nothing is typed beside the record.** Totals, grades, GPA, fee charges, class lists and score sheets are computed from the register. A lecturer types two numbers (CA and examination); the portal does the rest. A student never types a course code; the courses offered to their programme are listed for them.
- **Every change is attributed.** Each write carries the acting person, the acting office and a reason, and is kept on a tamper-evident audit trail. That is why every action button asks you to be signed in as one office, and why some actions ask for a reason in words.
- **A gate is a rule, not an opinion.** Course registration opens when the semester's school fees are paid in full; a score sheet leaves the lecturer only when every registered candidate carries a mark or an outcome; a result reaches the student only on a Senate minute. When the portal refuses you, it says which rule refused you and, usually, which office can help.

1.2 Who uses it

Kind of person	Signs in with	Home screen
Undergraduate applicant	JAMB registration number (or the APP/YY/NNNNNN application number)	/applicant — My application
Postgraduate applicant	Email address or PG/YY/NNNNNN application number	/pg/portal — Dashboard
Student (undergraduate)	Matriculation number, or the admission number MOAUM/ADM/YY/NNNNNN before matriculation	/student — Dashboard
Postgraduate student	Matriculation or admission number	/student — Dashboard (postgraduate menu)
College of Health Sciences student (200 Level and above)	Matriculation or admission number	/college/student — the College dashboard
Lecturer, Head of Department, Dean, Examinations Officer and every other member of staff with an office	Staff number (username) or the email address the Registry set as username	/ — the office's own dashboard
External examiner	Email address (it becomes the username on activation)	/examiner — Examiner workspace

A member of staff is on the portal only after the Registry (or the Directorate of ICT) has created the person, granted at least one office and issued a first password. Students are on it from the moment the Academic Office brings them onto the register; a student's applicant password carries over on first sign-in.

1.3 One sign-in door

Everybody signs in at the same page, /login . You type your number or email address and your password; the portal reads the shape of what you typed and sends you to the right side of the house. Below the form are links for the two public application doors ("Post UTME Registration" → /apply , "Postgraduate application" → /pg/apply) and "Verify a payment or receipt" (→ /verify).

Note: A "Sign in with the University's single sign-on" link appears only when single sign-on is configured on the server. It is **not deployed**; you will not see it, and you sign in with your password.

1.4 Browsers and devices

The portal is a website; nothing is installed. Use a current version of Chrome, Edge, Firefox or Safari on a laptop, a tablet or a phone. The screens are built to work at phone width: below about 900 pixels the sidebar becomes a drawer opened with the menu button, and below about 760 pixels tables scroll sideways inside their panels, tiles stack two to a row and buttons grow to a finger-sized height. PDFs (course form, receipt, examination card, statement of results, identity card, documents) open in a new tab and can be saved or printed from the browser.

1.5 How this manual is written

- Screens are named by their menu label and their address in the browser, for example **Course Registration** `/student/register`. Navigation paths are shown as indented lists:

text Academic → Course Registration

- Messages the portal shows are quoted exactly as it shows them, in quotation marks.
- Offices are named by their titles with the portal's code in backticks on first mention, for example Head of Department (hod).
- Where a feature is unfinished, a call-out says so: **Planned / Not Yet Implemented, Placeholder** or **Partially implemented**. A feature described without such a call-out is implemented and in use.
- > ****Screenshot Required:**** markers show where the printed edition carries a picture of the screen.

2 Getting started

2.1 Signing in

Screenshot Required: Sign in — `/login` — the two-column sign-in page with the crest panel on the left and the card with "Your number or email address", "Password" and "Sign in" on the right.

1. Open the portal address in your browser. You land on **Sign in** `/login`.
2. In **Your number or email address**, type the identifier for your kind of account (see the table in §1.2). As you type, a hint under the box tells you who the number looks like ("A student, on the matriculation number", "An applicant, on the JAMB number", and so on).
3. Type your **Password**. The eye button shows or hides it.
4. Press **Sign in**. The button is disabled until both boxes are filled.
5. You are taken to your home screen. If the Registry set your password (a new staff account, or a student account the Registry opened by hand), you are sent first to **Your password** `/account/password` (staff) or **Profile** `/student/profile?change=1` (student) and must choose a password of your own before anything else opens.

What you will see if it goes wrong:

Message	Meaning
"That username and password do not match an account."	Staff: unknown username, wrong password, or the person's record has been ended. The same words are used whichever it is.
"That number and password do not match a student account."	Student: wrong number or password, or the student has no admission or matriculation number yet.
"That number and password do not match an application account."	Applicant: wrong JAMB/application number or password.
"No portal account has been opened for this number yet."	A student who never had an applicant account (a migrated student). The Registry opens the account from the student's record. A migrated account may sign in the first time with the student's own number as the password.
"This account is locked after repeated failures; try again after HH:MM."	Five wrong passwords in a row lock the account for fifteen minutes.
"The portal was updated. Sign in again."	The service was redeployed; every earlier session is refused by design. Sign in again.

Tip: The hint under the identifier box uses an older pattern for matriculation numbers. A number in the current format (for example MOAU/AD/ACC/26/13568) may be labelled "A member of staff, on the staff number" while you type it. Ignore the label; the portal still signs you in as a student.

Note: A demonstration roster of invented accounts exists for training (docs/demo-accounts.md in the repository). Demo accounts sign in as demo.<office> for staff and MOAUM/MTC/26/9901 and neighbours for students. The password is in that file and is not printed here.

2.2 Forgotten password and reset

1. On the sign-in page click **Forgot your password?** → /login/forgot .
2. Type your staff number, matriculation number, application number, email or JAMB number and press **Send the reset link**.
3. The page always answers "If that names an account, a reset link is on its way" — whether or not an account matched. This is deliberate.
4. If an account matched **and** it has an email address or phone number on record, an email "Reset your MOAUM password" and an SMS are sent with a link to /login/reset?token=... . The link works for **one hour and once**.
5. Open the link. On **Choose a new password** type the **New password** and **Type it again**, then **Save the new password**. Eight characters at least; "The two do not match." appears inline if they differ. Success: "Your password has been changed". An incomplete link says "This link is incomplete"; a spent or old one, "This reset link has expired or was already used."

Warning: Delivery depends on an email or SMS provider being configured by the Directorate of ICT and on your account carrying an email or phone. A staff account with no email on record is emailed only if its username is itself an email address. If nothing arrives, ask the Registry to reset your password from **Users & roles** (it also clears a logout), or a student can ask the Registry from the Student record.

2.3 Changing your password

- **Staff: Your password** /account/password (you are sent there automatically when the Registry set your password). Fields **Current password**, **New password**, **New password, again**; button **Change the password**. The new password must be at least **ten** characters and must not contain your username.
- **Students: Profile** /student/profile , the **Current/New password** fields; at least **eight** characters.
- **Applicants:** through the forgotten-password link only.

Nothing is emailed when a password is changed.

2.4 Several offices: the office switcher

A member of staff may hold more than one office (a lecturer who is also Head of Department, for instance). The sidebar's **Signed in as** box lists every office your account carries. Choose one and the menu, the dashboard and your rights change to that office's. The choice is remembered in your browser.

- An office granted to you today appears in the list at your **next sign-in**, not before. Sign out and in.
- If a grant has been ended since you signed in, the portal answers "The office 'x' is not one this token carries" — sign out and in.
- Every action is recorded against the office you were acting as at the time, so choose the right office before you approve, sign or enter marks.

2.5 Signing out, session limits and logout

- **Sign out** is the button at the foot of the sidebar. It ends the session on the server and clears the browser's cookies.

- A session lasts **12 hours** from sign-in; after that every request answers "This session reached its end. Sign in again."
- Whenever the portal is **redeployed**, every session opened before the deployment is refused: "The portal was updated. Sign in again."
- **Five failed sign-ins** lock the account for **fifteen minutes** (staff, students, applicants and postgraduate applicants alike). Postgraduate applicants are additionally slowed after twenty failures from one connection in fifteen minutes.
- Nothing is sent when you sign in, sign out or are locked out.

2.6 Where notifications are

The portal writes the same notice to your email address, your phone (SMS, where the event sends one) and to a page inside the portal:

Who	Where inside the portal
Student	Account → Notifications /student/notifications , and the "Notices sent to you" panel on the dashboard (the last 30). Each row shows the channel and a state — <i>Sent</i> , <i>Waiting to be sent</i> or <i>Not delivered</i> .
Lecturer and other staff	Overview → Notifications /me/notices (in the lecturer's menu; any staff account may open the address). Tiles All / This week / By email / Not delivered; filters by search and channel; each notice expands to its text.
Undergraduate applicant	"Notices sent to you" on Overview /applicant .
Postgraduate applicant	The "History of this application" list on /pg/portal shows the trail; the notices themselves go to your email.

Section 7 lists every event that sends a notice, and — equally important — the events that send **nothing**.

2.7 How the screen is organised

Screenshot Required: A staff dashboard — / — the Shell with the sidebar (crest, "Signed in as" select, folded menu groups with badges, sign-out at the foot), the top bar (breadcrumb, title, identity chip, "Search records") and the content column with tiles and panels.

The sidebar (dark blue, on the left) carries the crest, the **Signed in as** office select, the menu groups and, at the foot, **Sign out**. Groups fold and unfold; a number badge beside a group or an item is a live count of what waits there (registrations to approve, transcripts in the queue, and so on). A collapse control shrinks the sidebar to icons on a wide screen; on a phone it becomes a drawer behind the menu button.

Menu groups by kind of account:

- Staff offices draw from the set **Overview • Academic • Students • Admissions • Finance • Staff • Services • Reports • Administration • Me**. Each office sees only the groups and items that concern it (a lecturer sees Overview, Academic, Students, History and Me; a Dean sees Overview, Academic, Students, Admissions, Finance, Reports and Me).
- Students see **Start here • Academic • Learning • Services • Account**.
- Postgraduate students see **Overview • Academic • Finance • Research • Documents • Communication • Graduation • Profile**.
- Undergraduate applicants see **My application • Screening • Admission**.
- External examiners see one group, **External Examiner**.

The top bar shows the menu button (phone), a breadcrumb (group > item), the page title and subtitle, your name and office (the identity chip) and, for staff, a **Search records** button (keyboard shortcut /) that opens **Search** /search over students, staff, courses and credentials. Every search for a person is recorded against your account.

Inside a page you will meet the same building blocks everywhere: a *note* (a coloured box that states the one thing waiting on you), *tiles* (large figures), *panels* with tables, a *role line* ("You may act — Head of Department" or "Signed in as Lecturer · view only") that tells you whether your office may press the buttons, and *toasts* (brief messages at the corner of the screen: "Saved", or the refusal's title). A refusal also renders a red **problem notice** with the rule, the detail, "What to do" and the office that can help.

Every data table has a search box once it holds more than eight rows ("Search these N rows..."), pages of 10/25/50/100/All, a footer count and a **Print** button that prints the table headed with the University's name and the date.

Note: A few menu items still point at screens that exist only in the design prototype. Clicking one shows "is still the prototype's screen". They are named in this manual where they occur.

3 Student manual

This section walks through every screen a student has. Read §3.1–3.6 first: they are the order of a session — dashboard, fees, registration, matriculation. Postgraduate students and College of Health Sciences students have different menus for some of these tasks; see §3.23 and §3.24.

3.1 The dashboard

Screenshot Required: Dashboard — /student — the fee-gate note, the identity card with passport, "This session" steps, quick tiles and "Notices sent to you".

Start here
→ Dashboard

Dashboard /student reads your record and shows, from the top:

1. A **standing banner** if the published results have pronounced you *on probation* or *advised to withdraw* (see §3.9).
2. The **fee gate** note: "You are cleared to register" when this semester's school fees are settled, otherwise "Action required" with **Pay now** and **See breakdown**. If the Bursary has not yet stated what a payment releases for the session, the note reads "What a payment releases is not yet stated for this session".
3. Your **identity card** preview with your passport photograph.
4. **This session** — three steps: On the register → Course registration → Examination docket, each ticked when done.
5. A read-only **Student details** card (name, numbers, programme, level, status).
6. **Quick tiles:** My results, Fees & payments, Graduation (final year) or My documents, Deferment, Hostel and **Course form** — the last is enabled only once your registration is approved.
7. A **carryover warning** naming the courses you owe.
8. **Notices sent to you** — the last 30 messages the portal sent you, with channel and state.

3.2 Profile, password and biodata

Account
→ Profile
→ Biodata

Profile /student/profile shows the Registry's fields read-only and lets you keep three things current:

Field	Rule
Phone	Nigerian mobile number: eleven digits beginning with 0. +234 803... and 803... forms are normalised. Refusal: "A Nigerian mobile number is eleven digits beginning with a zero."
Personal email	Must be a valid address. This is where password resets and notices go.
Contact address	Free text.

Below them, **Current password** / **New password** with a show/hide button; the button is enabled once the new password is eight characters or more. When you arrive with `?change=1` the page says "Choose your own password before you go on".

Note: The "On the register since" line on this screen always shows "—". It is a known display fault, not a gap in your record.

Biodata `/student/biodata` is the long form the University keeps on you, in sections: Identity (read-only), Personal, Contact, Origin & sponsorship, Parents or guardian, Next of kin & guarantor, Health, Bank account, Documents and Change history. Each field carries a badge:

- **From JAMB** — locked; it came from your admission record and is changed only by the Registry.
- Open fields save at once when you press **Save** or **Save and continue** →.

Placeholder: Some fields are badged "Needs approval" and the Registry has a *Biodata Changes* queue for them. In the current configuration no field is set to that tier, so nothing you type ever enters that queue; open fields save directly and locked fields are refused with "That field is locked". The screen text saying "the student is notified" of a decision describes a path that sends nothing.

3.3 School fees and payments

Screenshot Required: Fees & payments — `/student/fees` — the three tiles (Session charge, Paid, Outstanding), the status note, "The charge" table and the "Pay" panel with a reference and the card/USSD button.

Start here
→ School Fees — Pay First

How a charge arises. The Bursary states a fee schedule per session. Your charge is computed from it for your level, entry mode, faculty, programme, indigene status and the semesters that are open; you never type an amount, and nobody can invoice you for a line that is not on the schedule. Charges accumulate as semesters open. A charge of "—" with "No charge is stated for {session} yet" means the Bursary has not stated the schedule for your level or programme.

What a payment releases. Course registration for a semester opens when that semester's school fees are paid **in full**. The examination card, results, transcript and convocation are released under the Bursary's *clearance scheme* (the seeded scheme releases registration, the identity card and the library at the first instalment and everything else on payment in full; hostel is never gated). Arrears from an earlier session block everything while they stand.

Procedure — pay school fees

1. Open **School Fees — Pay First** `/student/fees`. Read the tiles: **Session charge**, **Paid** ("Settled in full", "Instalment 1 of 2" or "Nothing yet") and **Outstanding**.
2. In the **Pay** panel choose what to pay: **First semester** • **₦x**, **Full session** • **both semesters** • **₦x**, or **Second semester** • **₦x** (only the choices that apply are shown).

3. Press **Generate a reference for ₦{amount}**. The portal mints a payment reference of the form `MOAUM-FEE-...` valid for **24 hours** and shows it in large type: "Quote this reference and nothing else: at a bank branch, by transfer, or by card below."
4. Pay against the reference in one of three ways: - **Card or USSD**: press **Pay ₦x by card or USSD**. If more than one gateway is live you choose Paystack, Flutterwave, Quickteller or Quickteller PayDirect. Card gateways take you to the gateway's own page and bring you back to this screen; the portal confirms the payment the moment the gateway tells it the money landed. - **Quickteller PayDirect**: the screen shows "Pay ₦x to {biller} on Quickteller" with your PRN (the reference), a pay link, a USSD code and the biller code for a bank branch or ATM. After paying press **I've paid — check now**. "Not confirmed yet" means the collection has not reached the University; wait a few minutes and check again. - **Bank branch or transfer**: quote the reference. The Bursary confirms it against the bank's record.
5. When confirmed, the reference appears in **Payment History** as **Paid** with a **Receipt** link, and you receive "Your payment is confirmed" by email and SMS (receipt number included). Until then it is **Awaiting confirmation**; after 24 hours unconfirmed it is **Expired** — generate a new one; a reference is free.

Refusals you may meet:

Message	Cause and remedy
"no charge is stated for {session} yet"	No schedule for your level/programme. Ask the Bursary.
"the amount X is more than the balance of Y"	Pay the balance or part of it; nothing is taken beyond what is owed.
"This reference has expired."	Generate a new one.
"This reference is already confirmed as paid."	Nothing more to pay on it.
"A card checkout needs an email address on your record"	Add a personal email under Profile, or pay by PayDirect or at a bank.
"Card and USSD payment arrive when a payment gateway is wired to the portal."	No gateway is live yet; pay at a bank against the reference.
"The checkout could not be opened (...)"	Try again shortly, or pay by transfer or at a branch against the reference.

Receipt. Payment receipt `/student/receipt/{reference}` shows the receipt (number `RCT-YYYY-NNNNN`, date, payer, matriculation number, programme, session, semester, purpose, amount, channel, gateway or teller reference) with a QR code and a **check code**. **Download PDF** produces the one-page official receipt. Anyone — a bank, an office, a parent — can check it at `/verify/receipt/{reference}?c={code}` or by scanning the QR; the page answers "Genuine — this receipt is on the Bursary's ledger" or "Not verified". Before confirmation the screen says "This payment is not confirmed yet" and the PDF answers "Not confirmed".

Note: The subtitle of the Fees screen reads "2026/2027 session" whatever session you are looking at; it is fixed text. The "Instalment 1 of 2" caption assumes two instalments.

3.4 Wallet and funding (NELFUND, scholarships, top-ups)

Services
→ Wallet & Funding

Wallet & funding `/student/wallet` is the ledger of money the University holds on your behalf: NELFUND loan remittances, scholarships and grants the Bursary credits, and your own top-ups. You do not apply for NELFUND here — the Fund's decision is recorded and shown ("The Fund approved your NELFUND loan", "...did not approve..." with the reason, or "...is still with the Fund").

Task	Steps
Apply the wallet to fees	When "Your wallet covers what you owe" shows, press Apply Nx to {session} . The portal mints a school-fee reference for the amount and confirms it at once (channel "NELFUND wallet"); the receipt appears on the Fees page and the "Your payment is confirmed" notice is sent.
Top up	Under Top up the wallet type an Amount and press Generate the reference ; pay it by card/USSD from the same panel or on the Fees page. When confirmed, the wallet is credited.
Withdraw a surplus	Under Withdraw to your bank account enter Amount (blank = all), Bank , Account number , Account name and press Request the withdrawal . Allowed only when the session's fees are cleared in full, there are no arrears, the wallet has a balance and no withdrawal is pending; otherwise the panel says "Not available yet" and why. The Bursary approves and a second officer records the payout; states REQUESTED → APPROVED → PAID, or REJECTED with the reason.

Note: The amount you ask to withdraw is not checked against the balance in the browser; the Bursary refuses an over-large request. The portal records the payout; it does not move the money itself.

3.5 Course registration

Screenshot Required: Course Registration — </student/register> — the semester switcher, the "You cannot register yet" gate card or the Core/Elective pick lists with the units meter and "Save the draft" / "Submit for approval".

Academic
→ Course Registration
→ Registration History

What you register. The portal lists the courses your programme offers at your current level for the session and semester — Core and GST courses (fixed), Electives (chosen) — plus your **outstanding carryovers**, which are added automatically and cannot be removed. You register one semester at a time; the second semester is offered once the first is registered ("You have not registered First semester yet — register it first...").

The gates. Before the pick lists open, the screen shows a **You cannot register yet** card with four rows — Student status, On the register, Financial clearance (charge, paid, outstanding and a **Pay Nx** button) and Registration window. All four must pass:

Gate	Rule
Student status	ADMITTED, ACTIVE or PROBATION. A deferred, suspended or withdrawn student does not register ("A student who is ... does not register.").
Fees	This semester's school fees paid in full: "the first semester school fees for 2026/2027 are not fully paid — Course registration for a semester opens when that semester's school fees are cleared in full; the position updates the moment a payment is confirmed."
Window	The semester must be OPEN on the University calendar.
Deferment	An approved or active deferment for the period refuses registration outright: "REGISTRATION UNAVAILABLE: your deferment for ... is approved; you cannot register for the deferred period".

Procedure — register courses

1. Open **Course Registration** </student/register> . Choose the semester in the switcher.
2. Tick your **Electives** in the Electives panel; the **{level} Level Core Courses** and carryovers are already on the form.
3. Watch the **units meter** — "N of min–max credit units" with the pill *Below minimum*, *Over limit* or *Valid*. The limits per semester are 18–24 units at 100–600 Level (postgraduate levels: 700 → 9–48, 800 → 6–48, 900 → 0–48). In a SIWES semester the form is fixed to exactly the SIWES course's units.

4. Press **Save the draft** at any time to keep your choices.
5. Press **Submit for approval** (enabled only while the meter reads *Valid*). The status becomes **Submitted** — "Submitted on ... — with your Head of Department".
6. Your Head of Department **approves** or **returns** the registration. Approved: "Approved on ..." and the **Course form** button appears (§8). Returned: "Returned to you" with the HOD's reason; edit and submit again.

Warning: The portal does **not** email or SMS you when your registration is approved or returned. Check the screen.

Messages you may meet on submit:

Message	Meaning
"the registration carries N units; at 100 level the range is 18 to 24"	Add or drop electives until the meter is <i>Valid</i> . The hint mentions "an overload approval from the Head of Department", but no overload mechanism exists ; a registration above the maximum cannot be submitted or approved.
"you are on probation (CGPA ...); the registration carries N units and the limit on probation at ... level is ..."	Only if the Registry has set a probation ceiling for your level (none is set at present).
"No core course is offered to your programme this semester yet"	Registration has not been opened for the session/semester, or the programme structure is empty. Ask your department.
"that course is not offered to your programme at your level this semester"	The course is not bound to your programme or has no offering this semester.

Add and drop after submission. While the semester is OPEN and today is on or before the late-registration date, an **Add or drop courses** panel appears on a submitted or approved registration. *Add* is refused if it takes you over the maximum ("adding this course puts you at N units, over the maximum of M at L level"). *Drop* is refused for a carryover ("a carryover cannot be dropped; it must be repeated") and for a course in which a mark is already recorded ("a mark is already recorded in this course; it cannot be dropped"). Outside the window: "add and drop is not open for {session} semester n".

Statuses of a registration: *Draft* → *Submitted* → *Approved* (or *Returned* → edit → *Submitted* again). The record also allows a *Locked* status, but nothing on the portal sets it today.

Registration History /student/registration-history and the lower half of **My Courses** list every registration with Course code, title, lecturer, units, type and status, and the number of carryovers. (Its text says "the Faculty Officer approved" — the approval is in fact the Head of Department's.)

The course form. Once approved, **Course form** /student/form shows the registration as a document — passport, name, matriculation number, level, session, semester, the course table (carryovers first, marked "· C/O"), total credit units and a verification code — with **Download PDF** and **Print**. Until then it says "The course form is issued when your registration is approved". See §8 for what is on the PDF and how it is verified.

3.6 The matriculation number

What it looks like now. Since the Registry's schedule was configured (V263), a matriculation number is built as

MOAU / {FACULTY} / {PROGRAMME} / {YY} / {SEQUENCE}

- **MOAU** is the University code.
- **{FACULTY}** is the faculty's segment (for example AD for Management Sciences, BM for Basic Medical Sciences, PHRM for Pharmaceutical Sciences, LAW for Law, TS for Technology, CS for Communication).
- **{PROGRAMME}** appears **only** where the programme is configured to carry a code (for example ACC, CMP, MTH). Medicine and Surgery, Pharmacy, Law and every postgraduate programme carry none, and the separator is simply omitted — there is never an empty segment. MBBS carries its own faculty segment **MBBS**.
- **{YY}** is the last two digits of your session of entry.

- {SEQUENCE} is drawn from a named series the faculty or programme belongs to (Administration, College, Pharmacy, Architecture, General); it only ever moves forward and a number already used is never reused.

Examples of the shape: MOAU/AD/ACC/26/13567 , MOAU/MBBS/26/6095 , MOAU/PHRM/26/199 , MOAU/LAW/26/85632 . Numbers issued before the change (the MOAUM/DEPT/YY/NNNN shape, and older BSU/... numbers) remain valid and remain yours.

When it is issued. Matriculation turns an ADMITTED student into an ACTIVE one. A number is issued when, and only when:

1. your school fees for the session of entry are **paid in full**;
2. your course registration for that session is **approved** by your Head of Department;
3. your name is on the **faculty list** the Faculty Officer confirms to the Academic Office (a queried name is held back until the query is withdrawn); and
4. the Academic Office or the Registry **runs matriculation** for the session — every faculty's list in one act — or issues a single number to a straggler who paid and registered later.

What happens next. You are told by email and SMS — "Your matriculation number is X. It is permanent, it opens the portal in place of your admission number...". From then on you sign in with the matriculation number; the admission number is retired (never deleted, never reused). The number is permanent: the register refuses any attempt to change it ("the matriculation number ... is permanent and is not changed"). A deferment, an identity card, a transcript or a certificate can be asked for only once you are matriculated.

Note: The applicant-side **Matriculation** page (/applicant/matric) still describes the older MOAUM / dept / YY / NNNN format in its "What you will be issued" table. The number you receive follows the format above.

3.7 My courses: course spaces, materials and assignments

Learning
→ My Courses

My Courses /student/courses shows one card per course on your **approved** registration — its *course space* — with the share of materials you have read and any assignment due. Open a card → /student/courses/{offering}:

- **Materials:** notes, slides, readings, video, audio or links the lecturer has published. **Open** counts as a read; the lecturer sees who has opened what.
- **Assignments:** title, brief, closing date and time, weight in the 40-mark continuous assessment, "marked out of", late window and late penalty. **Submit** opens a modal for text and/or one file of up to **5 MB** (PDF, JPEG, PNG, text, CSV, Word, PowerPoint, Excel, ZIP, MP3, MP4). You may **Replace** a submission until it is marked ("this submission is marked; it is not replaced"). After the closing time a submission is flagged late and the penalty applies; after the late window it is refused ("the assignment closed on ... and the late window of N hours has passed"). Marks and feedback appear on the same table once the lecturer marks.

A space is visible only once your registration is APPROVED and only if the lecturer has published something. Nothing is emailed when material or an assignment is published or marked.

3.8 Timetable and attendance

Learning
→ Timetable
→ Attendance

Timetable /student/timetable lists the class slots (day, time, venue, lecture/practical/tutorial) the lecturer has set for each course on your approved registration. **Attendance** /student/attendance shows the attendance the lecturer has recorded per course as a rate; below 75 % is flagged **At risk**. Both are read-only; there is nothing for you to enter.

3.9 Results, statement of results, broadsheet and carryovers

Screenshot Required: Results — </student/results> — the four tiles (This semester, Cumulative, Standing, Units this semester), the latest-semester table with "Where it is" and the Academic summary table.

Academic
→ Results
→ Result Broadsheet
→ Carryover

What you see and when. A result reaches you only when Senate has approved it on a minute. Until then **Results** </student/results> shows each course with **Where it is** — the desk the score sheet is on ("Submitted for verification / Second examiner", "Departmental board", "Faculty ...", "Validated / Senate, on the Registrar's minute") — and no mark. The header note reads "N of your M courses are published" or "All N courses are published under minute X — Released {date}".

Fee gate. If the clearance scheme in force says results are released on payment in full and yours are not, the marks, GPA and CGPA for that session are blanked **on the server** and the page says "Your results are withheld until your fees are settled".

Figures. Tiles show the semester GPA, the cumulative GPA, your **Standing** (the classification band your CGPA currently falls in: First Class Honours 4.50–5.00, Second Class (Upper) 3.50–4.49, Second Class (Lower) 2.40–3.49, Third Class 1.50–2.39, Pass 1.00–1.49; blank under 1.00) and units. The **Academic summary** table gives, per semester, CUR, CUE, WGP, GPA, TCR, TCE, TWGP, LCGPA and CGPA. Grades: A 70–100 (5 points), B 60–69 (4), C 50–59 (3), D 45–49 (2), E 40–44 (1), F 0–39 (0). A raw total of 39 is graced to 40. A published sheet that carries no mark for you, or "Absent", counts as F.

Probation and withdrawal. From 200 Level, a CGPA below 1.00 at the end of a first semester pronounces *probation*; a second consecutive CGPA below 1.00 at the end of a second semester pronounces *advised to withdraw*. The dashboard banner and the broadsheet lists carry the pronouncement.

Statement of results. Open a semester → **Semester Results** </student/results/{session}/{semester}> and press **Download result slip**. The PDF ("Semester Results · Exams & Records") lists course, unit, score, grade and points, the GPA/CGPA box, the CUR...CGPA line, the grading key, "Approved by Senate on ... · minute ...", a QR and a **check code** for verification at </verify/results> (§8). The PDF refuses with "Nothing published" for an unpublished semester and "Withheld" when results are withheld.

Result Broadsheet </student/broadsheet> is your whole history, one panel per published semester (CA, exam, total, grade, points and the summary line). **Print broadsheet** produces the PDF; it carries no QR.

Carryover </student/carryover> lists the non-elective courses you failed (0 points on a published sheet) and have not since passed, with the session failed in. They are added to your next registration automatically whenever the course is offered; a failed elective is never a carryover. "How a repeat is scored" is explanatory text.

Placeholder: The **Official transcript** button on the Results screen is disabled with the text "Arrives with the credentials module". That text is stale: transcripts are requested under **My Documents** (§3.20).

3.10 Result queries

Academic
→ Result Query

For **seven calendar days** after a result is published you may query **one mark in one course**: the examination mark, the continuous-assessment mark, or an absence recorded for a paper you sat.

1. Open **Result Query** </student/query>. The note reads "The query window is open until {date}" or "The query window is not open".
2. Under **Raise a query** choose the **Course** (only queryable sheets are listed, with your mark), **Which mark** (EXAM / CA / ABSENT) and write **What you say is wrong**. Both are required ("A query names the mark it is about.", "Say what you say is wrong.").
3. Press **Submit the query**. You receive a reference [QRY-YYYY-NNNNN](#); the query is routed to the department that owns the course.
4. Read the answer in **Your queries**: *With the department*, then *Upheld* (the mark stands), *Corrected* or *Closed* (not a query), with the officer's words. You are told by email ("Your result query {ref} is answered") and SMS.

Refusals: "the query window for this course is not open"; "a query on this mark is already open".

Planned / Not Yet Implemented: A query answered *Corrected* has **no mechanical effect** on the portal today. The screen text "A corrected mark does not quietly change your result" and the desk's note about "an amendment minute" describe a path that does not yet exist: a published sheet cannot be reopened or amended. A correction, if any, is a Registry matter outside the portal.

3.11 Examinations: the docket and the examination card

Learning
→ Examinations

Examinations </student/exams> lists, for each open examination session, the courses on your approved registration with **Date & time** ("Not yet timetabled" until the Examinations Office sets the slot), **Venue** and **Status** (*Docket ready*, *Awaiting slot* or *Withheld*). The note says "Bring your identity card", or "Your docket is withheld until your fees are settled" when the scheme's examination release is not met.

Download exam card produces the examination card PDF (§8); **Print the docket** prints the list. The card is refused with "No approved registration" or "Not cleared for examinations".

3.12 Held scripts

If you sat a paper before your registration for that course was approved, the lecturer can **hold your script** by matriculation number instead of grading it. You are told at once by email and SMS: "Your {code} script is held until you register". Nothing else is needed from you except to get the registration approved: the moment it is, the held mark is released into the score sheet. If the semester's late-registration date passes first, the held script **lapses** and never grades. Held scripts are also read by the Bursary as a list of students whose registration waits on fees.

3.13 Deferment

Screenshot Required: Deferment — </student/deferment> — the state banner, the Deferment application fee panel (Pay ₦10,000 Deferment Fee / the receipt), the three-step form, the approval timeline, the Academic effect panel and the Deferred courses table.

Academic
→ Deferment

A matriculated student may apply to defer one semester or a whole session. The **application fee** (₦10,000 unless the Bursary states otherwise) is paid first; the form opens only when the payment is confirmed. The application then passes, in this order, the **Bursary** (which verifies your last school-fee payment from the finance record), your **Head of Department**, your **Faculty**, the **Academic Office** (which forwards approved applications to the DVC in a numbered batch), and the **Deputy Vice-Chancellor (Academic)**, whose approval, given with a comment, is final.

Eligibility. The banner says "DEFERMENT APPLICATION NOT AVAILABLE" with the reason when: you are not yet matriculated; your status is graduated, withdrawn, expelled, transferred out, deceased, rusticated or suspended; an application is already live; or you have used the sessions the University allows (2 in all; a semester counts a half).

Procedure

1. Open **Deferment** /student/deferment . In **Deferment application fee** press **Pay ₦10,000 Deferment Fee**. A payment reference is generated (valid 24 hours). Pay by card or USSD with **Pay now**, or at any bank branch quoting the reference (the Bursary confirms it). The panel then shows Amount, Payment Status PAID, Transaction Reference, Payment Date and **View Receipt / Download Receipt**. The fee is not refunded if the application is refused.
2. The form opens. Step 1: your **Student information** is read from the record (you cannot change it). Choose **Deferment type, Academic session, Semester, Reason** and write the **Additional explanation** where the reason needs it. **Save and Continue**.
3. Step 2: **Supporting documents** (PDF, JPEG or PNG, up to 5 MB, at most six). A medical, maternity or employment reason requires one. You can open a document you uploaded in a viewer on the page.
4. Step 3: **Review**, tick the declaration and press **Submit Deferment Application**. Toast: "Deferment request DEF-... submitted successfully". The application is now **WAITING BURSARY ACTION**.
5. Follow the **Deferment application** panel: Application number, Application fee, Payment status, Application status, Current office, and the **Approval timeline** — Application submitted ✓ → Bursary approved → Head of Department approved → Faculty approved → Forwarded to the DVC by the Academic Office → Deputy Vice-Chancellor approved (final approval). The status badges read WAITING BURSARY ACTION, WAITING HOD ACTION, WAITING FACULTY ACTION, WAITING ACADEMIC OFFICE ACTION, WAITING DVC ACTION, APPROVED, APPROVED · IN FORCE, COMPLETED, REJECTED, RETURNED FOR CORRECTION.
6. If a desk **returns** the application, the banner names the office, the date and the reason; press **Continue the Application**, correct it and submit again — it goes back to the same desk, and the history is kept. If a desk **rejects** it, the reason is on the record and the application is kept. While in review you may **Withdraw Application**.
7. When the Deputy Vice-Chancellor approves, you receive "DEFERMENT APPROVED" by email and SMS with the deferred period, the duration, the expected return, the number of courses affected and the timeline extension. The daily clock brings the period into force on its start date: your status becomes DEFERRED and registration for that period is refused. Fourteen days before the return date you are reminded; on your return the department, faculty or Registry confirms it.

What the approval does to your record (the **Academic effect of your deferment** panel): the courses of the deferred period are marked **DEFERRED** — no F, no zero, no carry-over, no GPA or CGPA change; your **expected completion** moves by exactly one semester (or one session); your **entry session** and **matriculation number** never change. The **Deferred courses** table lists each course with its original period and its status — DEFERRED, REGISTERED (once you take it again) or COMPLETED (once a result is published). After your return, they appear on your registration form under **Deferred / catch-up courses**, added automatically like carry-overs but never called failed; their grades enter your GPA only when you complete them.

You are told by email and SMS at every turn (§7). **Download Approval Letter** opens the letter once the DVC has approved (§8).

Matriculation and your sign-in (V267). Until you are matriculated you sign in with your admission number. When the Registry issues your matriculation number you are told by email and SMS; from that moment the matriculation number is your portal sign-in username — same account, same password — and the admission number no longer opens the portal. The number is permanent and appears on every document the University issues to you.

3.14 Inter-departmental transfer

Academic
→ Inter-Departmental Transfer

Inter-Departmental Transfer /student/transfer lets a matriculated, active student apply to move to another programme. The **Apply to transfer** panel appears only when you are matriculated, ACTIVE or PROBATION, have no live application and the Bursary has set the processing fee (otherwise "Transfers are not open yet").

1. Choose the **Course applied for** (every programme except your own), write your **Reason**, optionally your **UTME score**, and submit.
2. Press **Pay the fee online** to generate the non-refundable processing-fee reference and pay it (card/USSD or bank).
3. Watch the seven stages: Applied → Payment → Current department → New department → Registrar → Academic office → Completed. Each desk approves in turn; the current department cannot approve before the fee is confirmed.
4. On completion the programme (and level, if the Academic Office set one) changes on your record and "Your transfer is complete" shows with an **Approval letter**. A decline shows the note. Your matriculation number never changes.

Warning: No notice is sent at any stage of a transfer; check the screen. The printable approval letter still quotes a fixed fee of ₦10,000 and cites Senate/SAIC approval, which the current four-desk pipeline does not involve — treat those lines as legacy wording. After completion your registration menu shows the new programme's courses only when registration next opens for it.

3.15 Hostel accommodation

Screenshot Required: Hostel — /student/hostel — the status notice, the seven steps (Applied → Cleared) and the "Apply for accommodation" panel.

Services
→ Hostel

Hostel /student/hostel carries your whole stay: application, allocation, payment, acceptance, check-in, transfer, maintenance, checkout and clearance. One status notice at the top tells you where you are; the seven steps below it are Applied → Allocated → Fee paid → Accepted → Checked in → Checkout → Cleared.

Procedure — apply and take up a bed

1. When the housing desk opens the session's window the notice reads "Apply for a bed — Nx for the session" (or "You are not eligible to apply this session" with the reason: status, level, faculty, registration not submitted, an unsettled damage charge, an uncleared previous stay, or still checked in elsewhere). Everyone eligible is emailed and texted "Hostel applications are open".
2. Fill **Apply for accommodation: Hall preferred** (free beds shown), **Room type preferred**, **Block preferred**, **Priority category** (No priority — the ballot / Disability / Medical condition / First year / Final year / University sports / Other) with **What the category rests on** (required when a category is chosen), **Special or medical accommodation need**, **Preferred roommate** (a matriculation number; "No student carries the number X." if wrong) and a **Roommate note**. Press **Submit application** — "Hostel application submitted successfully." One application per session ("an application for ... already stands").
3. If the desk reviews applications you may be asked for a **correction** — withdraw and apply again — or be approved, rejected or waitlisted; you are told each time.

- Allocation is by the session's method (ballot from a published seed, first-come, level, faculty, programme, special needs, or by hand). Allocated: "A bed is held for you — N hours to pay" (72 hours by default). Press **Pay ₦... now** → **Generate the payment reference** → pay on the Fees page or by card. Unpaid, the hold **lapses** and the bed passes to the next name on the waiting list ("Your hostel hold has lapsed"). Waitlisted: "Waiting list — position N"; a bed may later be offered to you.
- Fee confirmed: "Fee confirmed — accept your allocation". Press **Accept allocation**, read the hostel rules and tick "I have read the hostel rules and regulations and will abide by them." (the acceptance names the rules version; if the rules changed after your page loaded, reload and accept again). Or **Decline** with a reason.
- Present yourself at the porter's lodge; the porter checks you in and records the room's condition. "You are checked in — {place}". The **Allocation letter (PDF)** is available from the moment the fee is confirmed.
- During the stay: **Request a transfer** (hall, room type, reason), raise a **Maintenance** request (kind of fault, urgency, what is wrong → "Send to the housing desk"; only once you hold a confirmed bed — "The bed is held, not yet yours; pay the fee first."), and see your **Roommates**.
- At the end: **Request checkout** (intended date, reason). The porter inspects the room; a **hostel clearance** opens with nine requirements (room, bed and mattress, key, access card, furniture and assets, no damage, no maintenance issue assigned to you, accommodation fee settled, damage charges settled). A **damage charge**, if any, becomes a payment reference on your Fees page ("A damage charge of ₦X stands against you"). When every item is cleared, waived or not applicable: "Checked out and cleared" with the **Clearance certificate (PDF)**, and the HOSTEL unit of your convocation clearance is signed automatically. An unpaid charge or an uncleared stay blocks the next session's application.

Every turn is emailed and texted (§7). The letter and the certificate carry a QR the porter checks at `/verify/hostel/{reference}`.

3.16 Library

Services
→ Library

Library `/student/library` shows **On loan** (with **Renew** when the item is not overdue and you have renewals left — the rule in force is 14 loan days, ₦50 fine per day, 3 items at once, 1 renewal, as set by the Librarian), **Fines** (press **Generate the reference**, then pay it on the Fees page — "Pay {ref}"), **Reservations**, and a catalogue search (`?q=`) with **Join the waiting list** on an item that has no copy on the shelf ("a copy is on the shelf; borrow it rather than reserving it"). An overdue item, a full quota or an unpaid fine stops the desk issuing you anything more. Your library standing (nothing on loan, no fine) is what the Library reads when it signs your clearance — the sign-off itself is manual.

3.17 Identity card

Services
→ Identity Card

Identity card `/student/idcard` shows a preview of the card front and back. The note says one of: "Card {no} · issued {d} · valid to {d}" (live card); "A card is made after matriculation" (no matriculation number yet); "Your card waits on the Bursary's clearance — Under the scheme in force, the identity card is released at the first instalment."; or "Your card has not been issued yet" (bring your fee receipt to the Library). The Library prints the card; Security hands it over.

Once a card is live: **Open the printable copy** → the ID card PDF (§8); **Report it lost** (a prompt asks what happened; the Library issues a replacement, and the old card is marked lost); **Request a replacement** goes to Help & Requests. The **Cards** table lists every card ever issued to you.

Note: "Blood group", "Graduates" and the kin phone print as "—" on the card; the QR on the back encodes only the text "MOAUM ID {serial}" and there is no card-verification page. The card is valid for four years from issue.

3.18 Health

Services
→ Health

Health /student/health :

- **Book an appointment: Reason for visit** and **Preferred time** (in the future — "choose a time ahead"), then **Book appointment**. One booked appointment at a time ("an appointment already stands; cancel it before booking another"); **Cancel** while it is booked. Walk-in triage runs 8 am–4 pm for urgent cases at University Health Services behind the Sports Complex.
- **On your record**: blood group, genotype and allergies are recorded only **with your consent (Record with my consent; Withdraw consent** restricts them rather than deleting them). Your fitness status, if the clinic recorded one, shows here; it is the only thing the Registry or your department can read.
- **Visit history**: date, reason, outcome, referral and clinician. Clinical notes never leave the clinic.
- **Who opened your record**: every access to your record is logged and shown to you.

Nothing is emailed by the clinic.

3.19 Help & Requests and ICT Support Tickets

Services
→ Help & Requests
→ ICT Support Tickets

Two different desks exist. **Help & Requests** is a one-line request to a University office; **ICT Support Tickets** is the Directorate of ICT's ticketing system for portal, payment, login and network problems.

Help & Requests /student/support :

1. Under **Raise a new request** pick the office — Registry, Bursary, ICT, Library, Student Services, Academic Office, My department, Housing.
2. Write **What is the problem?** (one line, required) and optionally **Anything more the office should know**.
3. Attach up to six **Supporting documents** (PDF, JPEG or PNG, up to 2 MB each).
4. Press **Submit request**. You get a reference `SR-YYYY-NNNNN`; at most five requests may be open at once ("five requests are open already; wait for an answer before raising another").
5. The office answers on the record; you are told by email and SMS ("Your request {ref} has an answer" / "...is resolved") and read the answer in **Your requests** (*With {office} → Answered — still open or Resolved*).

Planned / Not Yet Implemented: There is no way for you to write back on an answered request; the label "The student may write back" is aspirational. An office's desk for these requests exists at /support but is not on any office menu, so answers may be slow — for portal problems prefer a ticket.

ICT Support Tickets /tickets :

1. Press **Submit a New Ticket** → /tickets/new. **Who you are** is filled from your account (email is required and read-only when the account has one; phone optional).
2. Choose a **Category** (Payment, Login, Registration, Results, Examinations, Portal, Email, Account, Network, General, Other — each shows how it is handled and its priority) and fill the category's own fields (a payment reference and date, a course code, an error message...). Required fields are marked.
3. Write the **Subject** (up to 200 characters) and **Description** (up to 8,000), attach up to five files (PDF, JPEG, PNG, 5 MB each) and press **Submit the Ticket**. Your number is `TICK-YYYY-NNNNN`; at most ten tickets may be open at once.

- Follow it on `/tickets` (tiles Open / Awaiting your confirmation / Closed / All) and `/tickets/{id}`: Submitted → Opened (an agent read it) → In progress → **Resolved** (with the written resolution) → Closed. On *Resolved* press **Confirm Resolution** or **Reopen Ticket** (reason of at least five characters). You may **Close This Ticket** yourself while it is open, and add an update or a file in **The conversation**. A closed ticket takes no more updates.
- Emails come at each turn ("ICT Support Ticket Received — {n}", "Update on your ICT support ticket {n}", "Your ICT support ticket is resolved — {n}", "...is closed — {n}"); they also appear under your Notifications. Anyone can look a ticket up by number and email at the public page `/track`.

3.20 My Documents: transcripts, statements and certificates

Screenshot Required: My Documents — `/student/documents` — the tiles, "Documents issued to you" with Download PDF and Secure link, "My document requests" and the request wizard's first step.

Academic
→ My Documents

My Documents `/student/documents` is your document library and request desk. Five kinds of document exist:

Document	Number	How you get it	Fee	Turnaround
Degree certificate	CERT/YYYY/NNNNNN	Issued by the Registry to a graduated, Senate-approved and cleared student. You cannot request it ("A degree certificate is issued by the Registry, not requested.").	none	—
Official full transcript	TRN/YYYY/NNNNNN	Request	the transcript fee on the Bursary's schedule, × copies, plus urgent, physical and international delivery fees where chosen	5 working days (2 urgent)
Sessional transcript	STR/YYYY/NNNNNN	Request, naming the session	₦2,000 per copy plus extras	3 days
Mini-transcript	MTR/YYYY/NNNNNN	Request — self-service, issued at once	free	immediate
Statement of academic record	ASR/YYYY/NNNNNN	Request — self-service, issued at once	free	immediate

(Fees, turnaround and which kinds are self-service are the Registry's policy settings and may be changed.)

Procedure — request a document

- Press **Request a document**. Step 1 **Select document**: the kind (with its fee or "free"), and for a sessional transcript or a session-scoped mini-transcript the **Academic session** and **Semester**; the expected processing time is shown.
- Step 2 **Select delivery**: Digital, Physical or Both; **Copies** (1–10); **Urgent processing**; **International delivery**.
- Step 3 **Recipient**: Myself / An institution / An employer / An embassy / A professional body / Another authorised recipient. For a third party give the **Institution/organisation** (required), department, recipient name and **Recipient email** — "A secure expiring link is sent here; the document itself is not attached" — their reference and your purpose. A physical delivery needs a **Postal address**.
- Step 4 **Review the fee**; Step 5 **Confirm and submit**.
- Done: either "Pay ₦X against reference ..." with the card/USSD control (a free kind reads "The document was issued at once...", and a paid non-self-service one "It is with Exams and Records").

Refusals: "a document is issued against a matriculation number; the record has none yet"; "a sessional transcript names its session"; "no published result stands for {session}"; "name the recipient"; "a physical delivery needs an address"; "the same request was made within the day and is still in hand".

What happens next. *Payment pending* → *Ready* (or *Held at clearance* if the Bursary, Library or your department holds you on the TRANSCRIPT clearance) → *Processing* (the record is validated) → *Generated* → *Quality check* → *Released* by a second officer → *Delivered* → *Completed*. You are told at each step (§7). The **Timeline** button on a request shows the trail and lets you **Cancel request** while it is awaiting payment, ready or held.

Your documents. Under **Documents issued to you:** kind, number and version, issue date, status (*Valid*, *Revoked*, *Replaced*), the **verification code**, **Download PDF** (every download is logged) and **Secure link** — a link to `/documents/d/{token}` "Valid for seven days; each use is logged" that you can give to anyone; they see the document and can verify it against the record. A revoked or replaced document shows the reason and prints with a watermark.

Verify a document opens the public page `/verify/document` where anyone types the verification code or the document number and reads VALID / REVOKED / REPLACED / NOT FOUND / INVALID with only the fields the University discloses publicly (never your results, date of birth, contact or finances).

3.21 Graduation and clearance

Dashboard → Graduation tile (final year)

Postgraduate: Graduation → Graduation & Clearance

Graduation `/student/graduation` shows the steps to your award: the degree audit → Senate approval → cleared by every unit → certificate printed → collected; tiles; the award panel once Senate has approved (award, class, minute — you are told "Senate has approved your award" by email and SMS); and **Clearance for convocation**, a table of the eight units — Bursary, Department, Faculty, Library, Health, Hostel, Works and Maintenance, Alumni and Convocation — each *Cleared* or *Held* with the item outstanding. Each unit signs against its own record; the digital degree certificate is issued only when all eight are clear.

Note: The degree audit checks that every registered course is published and that the CGPA is at least 1.00. The screen's mention of core-course, credit-minimum, GST and project rules describes checks that are not yet performed.

3.22 Notifications

Notifications `/student/notifications` lists every notice the portal has sent you, with channel and delivery state, and a "How we reach you" panel. Channel preferences are display only — email and SMS are always on. See §7 for the full list of events.

3.23 Postgraduate students

A student admitted through the School of Postgraduate Studies signs in the same way and has the postgraduate menu. Fees, wallet, documents, identity card, library, health, help and tickets, deferment and notifications work exactly as above. Three screens are specific:

Course Registration & Results `/student/pg-courses`: type the **Session**, choose the **Semester** (First/Second), tick the courses of your programme's catalogue, set **Mode** (Full-time/Part-time) and press **Register these courses** / **Update registration**. The registration is *Submitted* at once; your department or the School **endorses** it ("Your registration is endorsed... Write to the department to change it."). A course already scored is locked. Once scored, the **Results** table shows CA, exam, grade (A 70+, B 60–69, C 50–59, F below 50; deficiency courses earn no credit), GPA/CGPA and standing (*Good standing* at 2.50 or above, *Probation* below). An approved deferment refuses registration exactly as for undergraduates. "No courses listed for this semester yet" means the School has not loaded the catalogue for that semester (the screen offers semesters 1–2 only).

Academic Progress /student/pg-progress : units earned, courses passed, CGPA, and a **Graduation eligibility** checklist (coursework, CGPA ≥ 2.50 , research cleared, oral examination passed, school fees, each convocation clearance unit) computed in the browser as guidance, not as a decision.

Research & Thesis /student/research : progress steps from *Supervisor assigned* to *Award*; your supervisors and, when constituted, the panel; **Topic & proposal** (**Save topic** while it is still editable — it locks once the proposal is approved — and **Submit proposal**); **Documents** — Proposal, Seminar paper, Plagiarism report, Draft for examination, Corrected copy, Final copy or Other as PDF or .docx up to **25 MB** with a note, **Submit Document**. Each submission is a new version; the School accepts or returns it with what to correct. Stage gates: "The draft is submitted for examination once your title is registered."; "The final copy is submitted after the oral examination." You are emailed at every stage change ("Your research: {stage}"), from supervision through proposal, seminar, title registration, panel, draft, viva, corrections, final submission, clearance, the Board's recommendation and Senate's award. Senate's award writes your graduand row and sets your status to GRADUATED. No notice is sent when a registration is endorsed, a score recorded or a document accepted or returned.

3.24 College of Health Sciences students

From 200 Level an MB;BS student is routed on sign-in to the **College dashboard** /college/student with the views Dashboard, Fees & payments, Course registration, Postings & logbook and Results history. The College runs on years rather than semester GPA:

- **Register** each semester of the year on that semester's school fees (**Register {semester}** / **Register N Level {session}**); clinical years register whole on the first semester's fees. "the N Level fees for {session} semester k are not yet cleared" is the refusal; "the earlier semester is registered first" the order. The 100 Level year stays on the University's ordinary registration and is judged by the College's rule (every non-GST course at 50 or more); a student who fails it sees the outcome and cannot register 200 Level ("the College's 100 Level rule does not promote: ...").
- **The examination ahead**: one professional examination per level (CPE at 200; 1st–4th Professional at 300–600), subjects marked CA 30 + examination 70 (+ clinical), pass 50, with an attendance minimum where the examination states one. The provisional decision (promote, resit, repeat, advised or required to withdraw, graduate) is applied automatically when every subject is resultted and confirmed by the College Academic Board.
- **Your postings** (400 Level and above) with the supervisor, and the **logbook** (procedures, cases, attendance, mandatory events) the supervisor keeps; you read it.
- **CA recorded so far, Fees by session, Semesters at your level** and the **results history with decisions**.

Note: The College sends no notices of its own (no email on a decision, a resit or graduation). Read the dashboard.

4 Applicant manual

4.1 Undergraduate applicants: the ten stages

A candidate whom JAMB has admitted to the University registers with the JAMB registration number alone. Name, programme, UTME score and O'Level results are read from the list JAMB sent the University and are never typed. One account then carries you through ten stages that the portal computes; the **Overview** /applicant shows a rail of them with "what next".

Stage	What it means	Who completes it
0	Account created; application fee not confirmed	you (registration)
1	Application fee confirmed	the gateway or the Bursary
2	Application form submitted	you

Stage	What it means	Who completes it
3	Seated in a published screening batch	the Academic Office
4	Screening score released	the Academic Office
5	Admission decision released	the Admissions Board / Academic Office
6	Offer accepted (undertaking signed and acceptance fee confirmed)	you
7	Six clearance documents verified	the Registry
8	Course registration approved	you and your Head of Department
9	Matriculation number issued	the Academic Office / Registry

Screenshot Required: Post UTME Registration — /apply — the JAMB registration number box with the green "Found on the UTME/Direct Entry list JAMB sent the University" note, the read-only name and programme, and the email, phone and password fields.

Stage 0 — Register by JAMB number

1. Open **Post UTME Registration** /apply (link "Post UTME Registration" on the sign-in page). The session is the current one unless the link names another.
2. Type your **JAMB registration number** (twelve digits then two or three letters). As soon as it is complete the portal looks it up: - "Found on the UTME/Direct Entry list JAMB sent the University" — your **Surname and other names** and **Programme you chose** appear read-only, and the remaining fields open. - "That number is not on the list JAMB sent the University" — the number is wrong, you did not choose this University on CAPS, or the tranche is not yet loaded. Do not travel to the campus to resolve this. - "Nobody can be verified yet, and so nobody is let through" — the University has not loaded JAMB's list yet. - "The University is not admitting into {programme} this session". - "An application account already exists for this number" — sign in instead.
3. Fill **Email address** (a typo hint such as "Did you mean gmail.com?" may appear), **Phone number** (eleven digits beginning with 0; +234 forms are accepted — "A Nigerian mobile number is eleven digits beginning with a zero."), **Choose a password** and **Confirm password** (eight characters at least — "Eight characters at the very least.").
4. Press **Continue**. Your account is created with an application number APP/YY/NNNNNN, you are signed in and taken to **Overview** /applicant. You receive "Your MOAUM applicant account" by email and SMS. An email already used by another account is refused ("the address ... already belongs to an application account").

Afterwards you sign in at /login with the JAMB number (or the application number) and this password. Forgotten password: the sign-in page's link; the reset link lasts one hour.

Stage 1 — Application fee

Application Fee /applicant/fee shows the **Post-UTME screening fee** plus the **Portal and payment charge** and the **Total payable** (the Bursary sets them per session; the defaults are ₦2,000 and ₦300).

1. Press **Generate a reference for ₦...** The reference (MOAUM-APP-NNNNNN-XXXX) is valid for 24 hours; **Generate a new reference** replaces an expired one.
2. Press **Pay ₦... by card or USSD** and pay on the gateway, or pay by bank transfer or at a branch quoting the reference (the **How you can pay** table). For PayDirect use **I've paid — check now** after paying.
3. When confirmed the page shows "Payment confirmed — ₦... received" with a **Receipt** panel, and you receive "Your payment receipt · RCT-..." by email and SMS. The form now opens.

Stage 2 — Application form

Application Form /applicant/apply is closed until the fee is confirmed ("The form opens when your application fee is confirmed"). Then three tabs:

1. **1 Biodata** — read-only from JAMB (name, date of birth, sex, state and LGA, JAMB number, UTME score or "Direct Entry"). The one field you type is **Next of kin — name and phone**; it saves when you leave the box and **cannot be changed after submission**.
2. **2 O'Level results** — your sittings exactly as JAMB sent them, or "No O'Level result has reached the University from JAMB yet". You do not enter O'Level results yourself.
3. **3 Review and submit** — a gate list ("Next of kin is missing" until you give it), the declaration "I declare that the particulars I have given are true...", **Save and come back later** and **Submit application**. Refusals: "the form opens when the application fee is confirmed"; "the next of kin is not given"; the declaration must be ticked.

Submitted: "Your application was submitted on ...", the **What you submitted** panel and **Print / Download (PDF)** of the application form. No notice is sent on submission.

Note: No document is uploaded at this stage. There is **no upload control** on any applicant screen: your passport photograph comes from JAMB's download, and originals are checked in person at clearance (stage 7). (An upload endpoint exists in the API but nothing on the screens calls it.)

Stage 3 — Screening slip and CBT seating

Screenshot Required: Screening Slip — `/applicant/screening` — the "Report at HH:MM on {day}" note, the slip card with passport, batch, date, report-by time, centre, room, seat, workstation and the QR.

Screening Slip `/applicant/screening` reads "Your examination schedule has not been published yet" until the Academic Office publishes the Post-UTME CBT schedule (batches generated but not yet published are invisible to you). Only candidates whose programme is screened by examination, who have paid and submitted, are seated. When published you receive "Your Post-UTME examination schedule" by email and SMS and the slip shows: passport, name, application and JAMB numbers, programme, attendance pill, the QR, and **Batch, Date, Report by** (the batch start less the check-in allowance, 30 minutes by default), **Examination time, Centre, Room, Seat, Workstation, Bring**, the examination instructions and what you may not bring. **Download slip (PDF)** — bring it with a valid identification document. If your batch is moved, postponed or cancelled you are told ("Your Post-UTME schedule has changed", "...has been postponed/cancelled") and the slip shows a red banner.

At the centre the door scans the QR; the check-in desk warns of "a second arrival on this slip" as impersonation. Anyone can verify a slip at `/verify/putme/{token}` (the QR's address).

Stage 4 — Screening result

Screening Result `/applicant/score` reads "Scores are released when every batch has been screened" until release; then tiles **UTME** (scaled), **Post-UTME screening** (its source — CBT, examination or O'Level computation), **Aggregate** (green or red against the cut-off) and **Departmental cut-off**, with **How your aggregate was calculated** and **Where you stand** (merit position, places). "No cut-off is stated for your programme yet" if none is set. You are told "Your screening result is released". A remark on a score is made at the Registry within seven days. The O'Level screening score itself is never shown to applicants.

Stage 5 — Admission decision

Programme eligibility (V266) appears on the Overview and on Admission Status as soon as the form is submitted. The portal reads your record — the O'Level result as JAMB sent it, your UTME subjects and score (or the Direct Entry award the Office captured) — against the session's admission settings for the programme you applied for, and shows one of four verdicts: **ELIGIBLE**, **ACADEMICALLY ELIGIBLE — ADDITIONAL SCREENING REQUIRED** (the programme also requires a named screening), **NOT ELIGIBLE**, or **PENDING VERIFICATION** (a result the rules need is not yet on your record). Every verdict is explained requirement by requirement — **View eligibility details** opens the table Requirement · Programme requirement · Candidate · Result, grouped as O'Level, UTME, UTME score and the programme. When you are not eligible, **Programmes you may be eligible for** lists every other open

programme your record qualifies for on the current policy, each with O'Level, UTME and Score marks; **View Details** shows its table and **Request Change** asks the Admissions Office to move your application to it, with an optional note. Nothing changes until the Office approves; you are told either way, and an approval is not an offer of admission — the Board decides in the normal way. You cannot request a programme the engine did not list, a second request while one is open, or any change once the Board's decision is released. **Recalculate** re-reads your record at any time; the reading also refreshes by itself when the settings or your record change, and the panel names the policy version it was read under.

Screenshot Required: Programme eligibility — `/applicant/status` after submission — the verdict panel with its reasons and the "Programmes you may be eligible for" table with View Details and Request Change.

Admission Status `/applicant/status` reads "Your application is with the Admissions Board" until decisions are released; then one of:

- **Offer of provisional admission** (programme, faculty, level, session, released date, your figures and merit position) with a red **Accept your offer**;
- "You are on the waiting list";
- "You were not offered a place this session" (with the Board's note).

You are told by email and SMS ("You have been offered provisional admission" / "You are on the waiting list" / "The admission decision on your application").

Note: When the University offers places through JAMB's own admission-status list, the decision is released without a notice. Check the screen. A waiting-list place is not promoted automatically; the office decides.

Stage 6 — Undertaking and acceptance fee

Accept Your Offer `/applicant/accept` opens only on a released offer. "To accept, you must do both":

1. Read the **Undertaking**, tick "I have read the undertaking and I accept it." and press **Sign the undertaking**.
2. **Generate a reference for ₦...** (the acceptance fee plus any checking fee; ₦25,000 by default if the Bursary has not set it — it is **non-refundable**) and pay by card/USSD, transfer or branch, as for the application fee.

When both stand, the offer is accepted: "Offer accepted — ₦... received", a **Receipt** with "Non-refundable: Yes", and the notice "Your place is held". **Print Offer Letter** now appears on Admission Status → the admission letter PDF (§8). You may instead **Decline this offer** ("Decline this offer? A declined offer is not reinstated."); nothing is emailed on a decline, and a declined offer cannot be taken up again.

Stage 7 — Document clearance

Document Clearance `/applicant/clearance` opens after acceptance ("Clearance opens when you have accepted your offer"). It lists six originals the Registry checks **in person**: O'Level certificate or statement of result; Birth certificate or declaration of age; Local government identification; JAMB admission letter; Medical fitness certificate; Passport photographs (six copies). Each is *Not presented*, *Verified* (with the date) or *Query* (with the note — you are emailed "A query on your clearance documents"). When all six are verified: "You are cleared" and the notice "You are cleared". "Nothing is paid at clearance, to anyone."

Partially implemented: The Registry records each item through the API; no officer screen for it was found in the current build, so this stage may show "Not presented" for longer than the physical clearance took. It does not block stages 8 and 9.

Stages 8 and 9 — Becoming a student

Once the Academic Office brings the session's admitted candidates onto the register you receive an **admission number** MOAUM/ADM/YY/NNNNNN (shown on **Matriculation** /applicant/matric under **What you carry now**; "Not issued yet." before). From that moment your applicant account is also your student account: sign in at /login with the admission number and the **same password**, and you land on the student dashboard. Pay school fees (§3.3), register courses (§3.5) and, when your Head of Department approves the registration and your faculty list is confirmed, the matriculation run issues your permanent matriculation number (§3.6). The Matriculation page then reads "Matriculation number issued" and "Your application account is now your student account".

Notices an undergraduate applicant receives (email + SMS unless stated): account created; password reset; fee confirmed (either fee); seated in a screening batch; CBT schedule published / changed / withdrawn / batch postponed or cancelled; scores released; decision released; place held (acceptance settled); clearance query; cleared; and, by email only, a suggested programme where the office proposes reconsideration. Nothing is sent on submission of the form, on a decline, or when a JAMB status list offers you a place.

Your admission, in one place (V269). *Admission Progress* (Admission group) opens once the Board's decision is released: the congratulations and the official details (name, JAMB and application numbers, session, faculty, department, programme, degree type, admission type, admission status, the admission and matriculation numbers when issued), the current status and the next step as a button, the acceptance fee (paid once, for the admission — never asked for again, whatever programme the admission ends on), the acceptance letter, and the progress tracker: JAMB admission → Acceptance payment → Acceptance letter → Online screening → Screening approval → School fees → Course registration → Matriculation. If the screening is unsuccessful the tracker shows that step failed and the two that replace it, Change of programme and Approval. Only the steps that concern you appear. The Overview shows the same block in brief.

Online Screening (V269). Where the session requires it, *Online Screening* (Admission group; formerly Document Clearance) opens the moment you have accepted the offer. It is the Registry's screening of fresh undergraduate students done on the portal, in the sections of the paper forms: Section A personal data (what JAMB and your application already hold is shown first; the rest — nationality, religion, marital status, maiden name where applicable, address, mobile, sponsor's name and address, parent or guardian and their profession and income, next of kin, primary and secondary school with the fees paid per term, year of graduation, working experience, blood group and the rest — is completed by you); Section B the institutions attended with dates and certificates; Section C your O'Level results with dates, offered as JAMB sent them for you to confirm, correct or add a second sitting; membership of associations; the documents (the required ones are marked: O'Level result, UTME slip, birth certificate or declaration of age, local government identification, passport photograph; and the optional JAMB admission letter, certificate of state of origin, marriage certificate, change of name, previous qualification); the declaration. **Save draft** as often as you like; **Review and submit** shows what is still required, then the declaration, and submits. Once submitted the form is read-only; an officer may return it with a note, and you correct and submit again. You are told the outcome here and by email: *successfully screened* — you may pay school fees and register under your admission number; *unsuccessful* — the reason is shown, the programmes you qualify for on the current admission policy are listed, and you may request a change of programme; your acceptance fee remains valid and an approved change takes you straight to school fees. School fees and course registration do not open until the screening is successful or a change of programme is approved.

Screenshot Required: Online Screening — /applicant/clearance — Section A with the fields, Section C with the O'Level rows, the documents table and the Review and submit dialog with the declaration.

4.2 Postgraduate applicants

A postgraduate applicant applies directly to the School of Postgraduate Studies (SPGS) with no JAMB number.

Screenshot Required: Apply — /pg/apply — the three-step wizard (Programme, Your details, Account) and the

"Check your application" card.

Apply and create the account

1. Open **Postgraduate application** </pg/apply> (link on the sign-in page). Step **1 Programme**: search the programme by name; programmes are grouped by faculty, and a research degree is marked "· research degree (you can add a proposal in the last step)".
2. Step **2 Your details**: Surname, Other names, Sex, Date of birth, State of origin and Local government, **Email** ("you sign in with it to pay"), Phone.
3. Step **3 Account**: Password (at least six characters) and Confirm password; for a research programme an optional **Proposed topic** and **Summary of the proposed research**.
4. Press **Create account & continue**. Client checks: "Choose a programme to continue.", "Your surname and other names are required.", "Your email is required — you sign in with it to pay.", "Choose a password of at least six characters.", "The two passwords do not match." One application per email: "An application already exists for this email."
5. On success: "Account created — PG/26/000123" with the application-fee reference and amount, **Sign in to pay and continue application**, and the email "Your MOAUM postgraduate application has been received". Your application is already in the state *Submitted*.

Sign in at </login> with the email address or the [PG/YY/NNNNNN](#) number. The public **Check your application** card (application number + email) tells you the state at any time without signing in.

The portal </pg/portal>

The header states your name, number and state. Tiles: Programme, Application fee, Documents (n/7), Stage. **Progress**: Application submitted → Application fee paid → Department decision → Faculty decision → School decision → Offer accepted → Admitted to the register.

Fees. Three fees exist (defaults ₦20,000 application, ₦3,000 checking, ₦50,000 acceptance; the Bursary or the School may set others). Each is paid against a reference ([MOAUM-PGAPP-](#) , [PGCHK-](#) , [PGACC-](#)... , 24-hour validity, reused while live) through the same card/USSD control or the Secretary's desk. After a gateway returns you the page polls for confirmation ("Confirming your payment..."); **I've paid — check now** asks again.

Procedure — complete the application (after the application fee is confirmed)

Every step below is closed until the application fee is confirmed ("Pay the application fee before uploading your documents."). Confirmation brings the email "Your application fee is confirmed".

1. **Academic record** — First degree: Institution, Degree / award, Field of study, Class of degree, CGPA, Year awarded. Other qualifications: rows of kind (Master's, PGD, HND, ND, NCE, PhD, Other), institution, award, field, class, CGPA, year.
2. **Referees** — up to five rows of name, Email, Phone, Institution, Position. **Save referees & send requests** emails each referee a private link ("Reference request — {applicant} (MOAUM Postgraduate)"). A referee who has already answered is shown "Reference received from ..." and cannot be edited; re-saving replaces the referees who have not yet answered (their old links stop working). You are emailed "A reference has been received" each time one comes in. The referee's form asks relationship, how long they have known you, an academic attestation, remarks and a recommendation; once submitted it cannot be changed.
3. **Documents** — one **PDF** per kind, up to **8 MB** each ("Each document is a single PDF file."): Higher degree certificate (several allowed), Undergraduate certificate, O'Level result, Birth certificate / declaration of age, NYSC certificate, LGA / indigene certificate, Change of name / marriage certificate (optional). A new upload of a kind replaces the earlier one (except higher degree certificates). Delete with the bin icon.
4. **Passport** — JPEG or PNG up to 4 MB.
5. **Application summary** — **Download / print summary (PDF)** or **Email me the summary**.

The decisions and after

The department (your programme's Head of Department) decides, then the faculty (the Dean), then the School. You see the states *Department recommended* / *Faculty recommended* / and, once the School has decided, **"Your admission decision is ready"** with the checking-fee reference. The decision and the desks' notes stay hidden ("What each desk decided is shown once the checking fee is confirmed.") until you pay the **checking fee** — email "Your admission decision is ready to view".

- **Offered:** "Congratulations — you have been offered a place" with the acceptance-fee reference. Paying it accepts the offer (email "Your offer of admission is accepted") and unlocks **Download / print offer of admission (PDF)** (§8).
- **Not offered:** "Admission decision — Not offered a place". A decline at any desk is final; there is no appeal on the portal and the same email cannot apply again.

When the School **admits** you, the panel "You are now a student of the University" shows your admission number MOAUM/ADM/YY/NNNNNN with **Go to the Student Sign-in**, and you receive "You are admitted — your student record is open". Sign in at `/login` with the admission number and **the password you chose as an applicant** — the account carries over. You then pay school fees, register coursework (§3.23) and are matriculated like every other student.

Notices a postgraduate applicant receives (email only; no SMS): application received; application fee confirmed; a decision on your application (pay the checking fee); decision ready to view; offer accepted; admitted; a reference received; the summary you asked for.

5 Lecturer manual

A lecturer (`lecturer`) reaches only their own courses: the courses the Head of Department has **allocated** to them for a session as lead lecturer, second examiner or co-lecturer. The class list, the score sheet, the course space and the attendance register are all built from **approved registrations** of those courses; a student who never registered cannot appear, and a mark can never be entered for one.

5.1 The lecturer's dashboard

Screenshot Required: Lecturer dashboard — `/` — the header card (Lecturer, Staff number, Current session, Semester in progress), the standing note, the eight tiles and "My assigned courses" with Students / Score Sheet / Enter Marks buttons.

Overview
→ Dashboard

Dashboard `/` opens on the current session and shows:

- A **note** stating the one thing waiting: "No course is allocated to you in {session}" (a course appears when the HOD allocates it and the Academic Office opens the examination session); "N score sheets have no marks yet" with **Enter {code} Marks**; "N sheets are still with you"; or "Every sheet you owe has been submitted".
- **Tiles:** Assigned courses (as lecturer / as second examiner or co-lecturer), Courses this semester, Registered students, Not started, In progress, Awaiting approval, Published, Result queries.
- **My assigned courses:** course, semester, units, registered, entered (red while short), status pill, due date and days, and per row **Students** (the class list), **Score Sheet** (the Excel template) and the next act — **Enter Marks**, **Continue Entry**, **Submit Sheet**, **Track Approval** or **View Result**.
- **Score sheet deadlines** for sheets still at entry — overdue in red, due within a week in amber.
- **Quick actions**, the five latest **Notifications**, **Course history** and **Your staff profile** links.

5.2 My Courses & Timetable and Course History

Academic
→ My Courses & Timetable
History
→ Course History

My Courses & Timetable `/me/teaching`: pick the **Session**; tiles Courses, Units you lead, Students, Class slots; the table of your offerings with role (Lecturer / Second examiner / Co-lecturer), level, semester, roll and the **Timetable** column (day, time, venue, kind). "No class slot set" until slots are set on the class-list screen (§5.3). A course code links to its course space.

Course History `/me/courses`: every course you have carried, this session and before, with your role, the class size and where each sheet reached.

5.3 Registered students, attendance and class slots

Screenshot Required: Registered Students — `/registration/class-list` — the scope bar with course, the four tiles, the roll table with the Clearance column, and the Attendance and Timetable slots panels below.

Students
→ Registered Students

Registered Students `/registration/class-list`: choose the session, semester and course (only courses allocated to you — "X is not allocated to you in S; a lecturer reads the class list of their own courses only."). Tiles Registered / owning department / Other programmes / Cleared to sit; the roll (matriculation number, name, programme, level, basis, clearance *Cleared* or *Blocked* — *fees*) with **Download class list**, **Attendance register** and **Examination roll** (CSV files); a warning naming students not cleared for examinations.

Below the roll:

- **Attendance:** pick the date, **All present** / **None**, tick per student, **Record N of M present**. Re-marking a date replaces it; "Rate so far" shows the recorded rate. This is what the student's Attendance screen and the course space's engagement panel read.
- **Timetable slots:** Day, Kind (Lecture / Practical / Tutorial), From, To, Venue → add; **End** a slot. These feed the students' timetable and your own.
- **Examination slot:** set by the Examinations Office (day, time, venue) — this is what the students' docket shows.

5.4 Score sheets

Screenshot Required: Score entry — `/results/sheets/{id}` — the header pill, the Download the template / Upload a completed sheet / Save the draft / Submit and attest buttons, and the roll table with CA, Exam, Total, Grade, Points and Outcome columns.

Academic
→ Score Sheets
History
→ Score Sheet History

Where a sheet comes from. The Academic Office or Exams & Records opens an **examination session** (Main, Re-sit or Special) for a session and semester with dates and a score-sheets-due date. Opening it generates one score sheet per offering that already has a lead lecturer; allocating a lecturer while the session is open creates the sheet at once. The

candidates on a sheet are the approved entries on approved registrations — the roll. A Re-sit sheet carries only the candidates who were absent or scored 0 points on the published Main sheet; a Special sheet the absentees.

Score Sheets `/results/sheets` lists your sheets for the session and semester: course, candidates, entered ("N scripts held" if any), stage pill ("N days overdue", "Returned once"), second examiner ("Not yet set"), and **Continue / View**. "A sheet that has left this desk is readable, not editable."

Procedure — enter and submit marks (`/results/sheets/{id}`)

1. **Download the template:** an Excel workbook with every registered candidate already on it, in alphabetical order — columns S/N, Matriculation number, Name, Programme, Level, CA (o-{caMax}), Exam (o-{examMax}), Outcome — with data validation on the mark columns. The split (CA out of 40 and examination out of 60 by default) is the course's own setting; the tiles show "CA out of".
2. Either type the marks on the screen — **CA** and **Exam** per row (Enter, ↓ and ↑ move down and up a column; a cell over its maximum turns red with "More than N") — or fill the workbook and **Upload a completed sheet** (.xlsx or .csv). An upload is checked whole before anything is written: if any line is refused (unknown outcome, out of range, a locked row changed) the whole file is refused — "{file} was not accepted — N lines refused, nothing written" — with **Download Validation Report**. Candidates on the upload who are not on the roll are set aside: **Hold these N scripts** (§5.6) or **Leave them**.
3. For a candidate who did not sit or must not be graded, set the **Outcome**: Graded (the default when both marks are typed), Absent, Withheld, Incomplete, Malpractice or Exempted. A blank is not an outcome.
4. **Save the draft** as often as you like. The rule on saving: both CA and exam or neither; each within its maximum (" {code} assesses out of 40 and examines out of 60; a mark outside that was entered."). Once saved, a mark is **locked** — "A saved mark is on the record; the lecturer does not change it on their own." — until the sheet is returned to you.
5. When every row carries a mark or an outcome the header reads "Complete — not yet submitted". Press **Submit and attest** → **I attest these marks**. Total, grade and points are computed by the register (a raw total of 39 is graded to 40); you never type them.

Refusals: "N registered candidate(s) on this sheet have no mark and no outcome — ... A blank is not an outcome."; "The sheet is at {stage}; a mark changes by amendment with a reason, not by entry."; "An amended mark carries its reason."

Returned sheets. If a later desk returns the sheet, the note reads "Returned to you once/N times" quoting the office and its comment, and "Returned to you — every mark is open for amendment". Change what must change, give the **Reason, if amended** on each changed row, and submit and attest again. Every change is a new version on the record; nothing is overwritten.

Exports. Marked sheet · Excel / · PDF (once anything is entered): the roll with CA, exam, total, grade, points and outcome and a performance summary (grade counts, mean, highest, lowest). The PDF is the University's landscape A4 print; "The record is the register, not this print."

Score Sheet History `/results/sheets/history`: tiles Sheets on record / Published / In approval / Still with you; filter by session, semester and standing; Excel/PDF of each marked sheet.

5.5 What happens after you attest

Attesting moves the sheet from **Entry** through a chain of desks; you can follow it on the sheet ("This sheet has left the lecturer: {stage}") → **Open the approval chain**) and on your dashboard's **Track Approval**:

ENTRY (you)	
→ VERIFICATION	— Examinations Officer
→ DEPT_BOARD	— Head of Department
→ FACULTY_SCRUTINY	— Faculty Examinations Officer
→ FACULTY_COMPILATION	— Faculty Officer
→ FACULTY_BOARD	— Dean
→ RECORDS	— Exams & Records

→ SENATE	– Registrar / Deputy Registrar (Academic Affairs), on a Senate minute
→ PUBLISHED	– visible to students

Rules that bind the chain: every candidate must carry a mark or an outcome before the sheet leaves you; the same person may not take two consecutive stages ("you approved the previous stage of this sheet; another desk must approve this one"); a result is published only on a cited Senate minute. Any desk may **return** the sheet to you with a reason; it re-enters at verification when you resubmit. A sheet whose fail rate exceeds half its candidates is flagged for review at each desk (a caution, not a block).

Warning: Nothing is emailed to students when a result is published, and nothing is emailed to you when a sheet is returned — the dashboard's Notifications panel text suggests otherwise, but no such notice is generated today. Look at the sheet's stage. The **Remind** / escalate buttons an officer may press on an overdue sheet also send nothing ("The notification module is not on the portal yet; nothing was sent.").

Placeholder: On a published sheet the approval chain shows **Raise an amendment** and **View as a student**; neither button does anything. A published sheet cannot be reopened or amended on the portal.

5.6 Held scripts

Under every score sheet is the panel **Scripts from candidates not on the roll**. A candidate who sat the paper without being registered for the course is held by matriculation number, not graded:

1. Type the **Matriculation number**, the **Outcome**, **CA**, **Exam** and an optional **Note** (e.g. "script no. 47, sat in LT 2") and press **Hold the script** — or **Download the held-scripts template**, fill it and **Upload held scripts** (accepted whole or not at all).
2. The student is told at once by email and SMS ("Your {code} script is held until you register").
3. When the student's registration for the course is approved, the mark is **released** into your sheet as a new version, automatically. If the semester's late-registration date passes first it **lapses** ("Late registration for this semester closes on {date}; a script not released by then lapses and never grades."). You may **Withdraw** a script while it is still held.

Refusals: "X is on the roll of {code}; enter the mark on the sheet"; "no student on the register is numbered X"; "a script is already held for X on {code}"; "late registration for this semester closed on {date}..."

5.7 Course spaces (LMS)

Screenshot Required: Course space — `/lms/{offering}` — the tiles, "Upload course material" form, "Published material" table, "Assignments" table and "Engagement — students at risk".

Academic
→ Course Spaces
→ Upload Material

Course Spaces `/lms` lists your offerings with enrolled, materials and assignments; **Open the space** → `/lms/{offering}`.

- **Upload course material:** Title, Week, Kind (Notes / Slides / Reading / Video / Audio / Other), Description, a file of up to **5 MB** (PDF, JPEG, PNG, text, CSV, Word, PowerPoint, Excel, ZIP, MP3, MP4) **or** an address, and "Publish to the N registered students now; unticked, it is saved as a draft". Larger files: link them by address. **Publish** or **Withdraw** from the **Published material** table, which also shows "Read by".
- **Assignments:** title, **Closes** (date and time), **Weight % of CA** (1–40), Kind (Individual / Pairs / Group), Brief, **Marked out of**, **Late window hours** (default 48), **Late penalty %** (default 10). **Mark** opens the submissions (file, text) with **Mark** and **Feedback** per student; a marked submission can no longer be replaced by the student.

- **Promote CA total to the score sheet:** the weighted gradebook total (capped at 40) is written into the CA column of the Main score sheet for every student whose CA differs — only while the sheet is at **Entry** ("no score sheet exists for this offering yet"; "the score sheet has left the lecturer; the gradebook is not promoted into it").
- **Engagement — students at risk:** last opened, materials read %, submissions, attendance %, CA so far, flagged *High risk / Watch / On track*. On-screen only; it feeds no report and sends no notice.

Only the allocated lecturer, second examiner or co-lecturer (and the HOD, Dean and Academic Office) may act in a space ("This course space belongs to the lecturer the department allocated."). No notice is sent to students on publication, assignment or marking. Similarity checking is not on the portal.

5.8 Result queries

A student may query one mark within seven days of publication (§3.10). The desk **Result Queries** </results/queries> is on the Head of Department's and the Examinations Officer's menus; a lecturer may open the address and, as a department office, may **Answer** a query on a course of the department: choose **Upheld** (the mark stands), **Corrected** or **Closed**, and write **What was checked and what was found. The student reads this.** The student is emailed and texted; the department is **not** notified when a query is raised — your dashboard's *Result queries* tile is the only prompt. A *Corrected* finding does not change the published mark (see §3.10).

5.9 SIWES supervision by a lecturer

Students
→ My SIWES Students

If the Head of Department or SIWES Coordinator has assigned industrial-training students to you, **My SIWES Students** </me/siwes> lists them and takes your **assessment out of 40** per student (the CA part); the coordinator records the practical report mark out of 60 on the SIWES desk. The row is graded only when both parts exist, and only while the SIWES score sheet is at Entry ("The SIWES score sheet is not open yet."). A change to a mark already saved asks for a reason. You may score only students assigned to you.

5.10 My Profile, Leave & Payslip

Me
→ My Profile
→ Leave & Payslip
→ ICT Support Tickets

My Profile </me/profile>: your photograph (JPEG or PNG, up to 2 MB — "A photograph is a JPEG or PNG image."), **Who you are** (email, phone, department, faculty, current responsibility, ORCID), **Research** (Google Scholar profile, areas of interest, Master's and PhD candidates graduated) and the one-per-line lists — publications, grants, patents, innovations, collaborations, conferences, assignments, achievements, contributions. **Save profile** writes the whole profile ("What you leave blank is saved as empty, not guessed."). Your name, staff number, department and rank are the establishment's to change, not yours.

Leave & Payslip </me>: **My record** (staff number, office, unit, grade; **My ID card (PDF)**, **Edit my profile**), **Payslips** (month, gross, pension, PAYE, net — only approved or paid runs; no PDF, print from the table), **Offices held** (office, scope, instrument, from, until) and **Leave** — request (Type, From, To, Cover, Note → **Request leave**; "Your leave request is with your office."), history and **Cancel** on a pending or approved request. Leave is for staff on the establishment: "Leave is for serving staff — Your record does not carry an active employment" otherwise. Your office (HOD, Dean, Registry or HR) decides; no email is sent on the decision.

Placeholder: The **Appraisal** tile reads "—" with "Staff module, not yet on the portal", and **Appointment** and **Next increment** always read "—". "Leave taken" assumes a 30-day entitlement.

ICT Support Tickets `/tickets` works for staff exactly as for students (§3.19). Staff without a person record on the Registry's register are refused ("Tickets are raised by students and members of staff signed in to the portal.").

5.11 External examiner manual

An external examiner (`extexaminer`) is a scholar from another institution recorded by a University desk, invited by email, and given a workspace of their own.

Screenshot Required: Examiner workspace — `/examiner` — "Welcome, {name}", the four tiles, "Upcoming deadlines" and "Recent assignments" with Start Review / Continue / View.

Invitation and activation

1. You receive "External Examiner Appointment — Rev. Fr. Moses Orshio Adasu University" with a link to `/login/activate?token=...`. The link works **once** and for **fourteen days**.
2. The page greets you by name and institution and states "Your username will be {email}". Choose a **Password** (at least ten characters, not containing your email address) twice and submit. Success: "Your examiner account is active" → **Sign In**. A spent or old link says "This invitation link has expired or was already used." — ask the desk to resend.
3. Sign in at `/login` with your email and the password.

The workspace `/examiner`: tiles Assigned projects, Pending reviews ("N not started · M in review"), Submitted, Overdue; a red note when a review is overdue; **Upcoming deadlines**, **Recent assignments**, **Recently submitted**, **Your appointment**. **My Projects** `/examiner/projects` (with *Pending Reviews* and *Submitted Reviews* filters) lists candidate, project title, documents released ("No documents released yet" until the desk releases them), programme, supervisor, session, deadline and status, with **Start Review** / **Continue Review** / **View Assessment**.

Procedure — review a project (`/examiner/projects/{id}`)

1. Read the candidate, the project and the **Documents** (only those the desk has released reach you). Opening the page records that you have viewed the project.
2. In **Assessment · {form}** score every line of each section (Written; Defence where the form has one) against its **Maximum** ("Over {max}" turns red) and add a comment per line. The **Total** is "Computed from the scores; it is not typed."
3. Write **General comments** (at least twenty characters), **Strengths**, **Weaknesses**, **Recommendations**, **Required corrections**, and choose the **Final recommendation**: Pass / Pass subject to corrections / Reassessment required / Fail.
4. **Save Draft** as often as you like. **Submit Assessment** is enabled only when every line is scored, none is over its maximum, a recommendation is chosen and the general comments are long enough; confirm "Submit this assessment?".
5. After submission the assessment is read-only. The University may **lock** it (you are emailed "Assessment Approved and Locked") or **reopen** it with a reason ("Assessment Reopened for Revision — ..."): the note shows "Reopened by the University on ... {reason}" and you edit and **Resubmit Assessment**.

Deadlines and reminders. A reminder is emailed once when a deadline is within three days ("Reminder: Project Review Deadline"), and once when it has passed ("Project Review Overdue"); a changed deadline is emailed ("Review Deadline Changed"). A withdrawn or reassigned project is emailed ("Project Assignment Withdrawn"). All examiner notices are by email; there is no SMS.

My Profile `/examiner/profile`: the University's record (name, email = username, institution, status, projects) read-only, and **Keep current** — phone, department, position, specialisation, qualifications, years of experience, country, region, ORCID.

If your appointment is suspended or ended you are refused with "Your examiner appointment is not active." A locked assessment cannot be reassigned or edited. No appointment letter or assessment PDF is produced by the portal.

6 Head of Department, Dean and other office holders

These offices are held by members of staff who also, in most cases, hold the lecturer office; everything in §5 applies to them as lecturers, and the office switcher (§2.4) decides which set of rights is acting. This section lists the tasks each office performs on the portal, with the navigation path and the rule that governs the act. Where an office's menu item points at a screen its API guard refuses, the manual says so.

6.1 Head of Department

A Head of Department (`hod`) is bound to one department — the scope on the office grant, else the department of the lecturer grant, else the home department on the staff record. If none resolves, the dashboard says "Your Head-of-Department office is not tied to a department yet" and every department list is empty; ask the Registry to set the scope on the grant.

Screenshot Required: HOD dashboard — / — the alert notes (Open approvals, Allocate teaching, Assign supervisors), the tiles (Registrations to approve, Courses without a Lecturer, SIWES without a supervisor, Result sheets in progress, Students, Cleared / owing), the courses-needing-a-lecturer table and the pipeline tiles.

Task	Path	What you do and the rule
Approve or return course registrations	Academic → Departmental Approvals /results/approvals (panel "Course registrations submitted by students")	Click a student to see the courses, units and basis; Approve or Return (a prompt asks "What must the student change? They read this." — a reason is required). Approval requires the student to be ADMITTED/ACTIVE/PROBATION and the units within the level's range (a SIWES semester exactly the SIWES units). Only the HOD of the registration's department (or the Super Administrator) may press; others read the queue. Neither act sends a notice — the student sees it on the registration screen.
Allocate teaching	Academic → Teaching Allocation /allocate	Per offering of your department for the session and semester: Assign the lead lecturer, a Second examiner ("Verifies the marks. Cannot be the lead.") and Co-lecturers ; tick "Lecturers from other departments" to reach the whole University. A lecturer's load may not exceed 12 units a semester unless you press Save as an overload (N units) . Assigning the lead creates the score sheet at once if the examination session is open. "A Head of Department allocates only courses that belong to their own department."
Department courses	Academic → Department Courses /catalogue	Create a course (+ New course : code "three letters, a space, three digits — e.g. CSC 311", units 0–12, title, level, semester, kind), Make live , End , Restore , set the curriculum tag (CCMAS/BMAS) and the CA/Exam split per course or in bulk, end duplicate courses. A course "Not bound to any programme — no student sees it at registration" until it is bound in the structure.
Programme structure	Academic → Programme Structure /catalogue/structure	Bind a course into a programme at a level with a basis (Core / Elective / Borrowed / GST) and a curriculum track; Remove is refused while students of that programme and level are registered on it this session. Level unit totals warn against the minimum and maximum.
Who may register a course	Academic → Who May Register It /eligibility	Read-only: the programme-and-level cohorts a course is offered to and how many are registered.
Score sheets — departmental board	Academic → Result Desk /results/desk, Departmental Approvals /results/approvals, Approval Chain /results/chain, Result Pipeline /results/pipeline	Your stage is DEPT_BOARD: Approve (advance to faculty scrutiny) or Return to the lecturer with a reason; Forward N sets in bulk from the Result Desk (sheets with a fail rate above half are left for individual review). The same person may not take two consecutive stages.

Task	Path	What you do and the rule
Score entry / Upload Results (bulk)	Academic → Score Entry / Upload Results (bulk) /results/sheets	These menu items open the score-sheet list; as HOD you read every sheet of the department. Entering marks is the lecturer's (and the Examinations Officer's and Academic Office's) act.
Broadsheet	Academic → Broadsheet /results/broadsheet	The computed examination reporting sheet for a programme and level (see §6.2).
Result queries	Academic → Result Queries /results/queries	Answer students' queries on the department's courses: Upheld / Corrected / Closed with the finding in words (§5.8).
SIWES supervision	Students → SIWES Supervision /siwes	Pick the session, semester and SIWES course; assign a Supervisor from the department's lecturers to each student; record the Practical /60 mark (a changed mark asks why). Inputs open only while the SIWES sheet is at Entry.
Class lists	Students → Registered Students /registration/class-list	The roll, attendance register and timetable slots of any course the department owns (§5.3).
Students	Students → Students /students ; Records & Queries /records	The register of the department's students, a search box, and each student's record (Student 360). Read-only for an HOD.
Deferments	Students → Deferments /deferments	Requests of the department's students. At Submitted press Recommend to the Faculty , Request Correction or Reject (a reason is required for the last two); Confirm Return when a deferred student returns. A request at another stage shows no buttons ("...is not this desk's act at that stage"). You are emailed when a request arrives ("A deferment request awaits the department") and when a return is due.
Department clearance	Students → Department Clearance /clearance	Sign the DEPARTMENT unit for a candidate: Clear , or Hold naming the item outstanding ("A hold names the specific item outstanding."). You cannot sign another unit's item. Notify held candidates sends nothing (placeholder).
Inter-departmental transfers	Students → Inter-Departmental Transfer /transfers	Approve or Decline (with a reason) an application at your desk: as the <i>current</i> department once the fee is confirmed ("This application is not ready at your desk. Awaiting payment."), or as the <i>new</i> department after the current one. The list itself is University-wide; only the buttons are yours.
Postgraduate admissions	Admissions → PG Admissions /admissions/postgraduate	For applications to your department's programmes at Submitted : Department: recommend or Decline , with an optional note. Opening an application of another department is refused ("This application is for another department's programme..."). Nobody emails you when an application arrives — check the desk.
External examiners	Academic → External Examiners /examiners , Examiner Appointments, Project Assignments, Assessments, Examiner Reports	Record an examiner, send the invitation, record an appointment, Register a Project for a finalist or postgraduate of your department, release documents, Assign an active examiner with a deadline and form, extend or reassign, read and Approve and Lock or Reopen a submitted assessment, run the eight reports (CSV). Your reach is your department.
Department staff, leave and appraisal	Staff → Department Staff /hod/staff , Leave Requests /hr/leave , Appraisal /hr/appraisal	The department's establishment list; Approve or Decline (with a reason) leave requests of staff whose home department is yours; record APER appraisals. HOD scoping relies on the staff record's home department — an empty roll means the Registry has not loaded the teaching-staff sheet.
Requisitions	Finance → Requisitions /finance/requisitions	Not available to this office : the menu item exists but the API refuses hod ; the page's data calls answer 403 unless you also hold an office in the guard.
Reports and statistics	Overview → Student Statistics /stats ; Reports → Reports & Returns /reports , Student Register, Staff Register	Statistics and returns cut to your department. A Head of Department may run a return but not Keep a copy ("Your office reads this return; the office that owns it keeps and files the copy."). Excel exports carry S/N first and sort names A–Z.

6.2 Dean

A Dean (dean) is bound to one faculty (the grant's scope, else the staff record's faculty). "Your Dean office is not tied to a faculty yet" means the scope is missing.

Task	Path	What you do and the rule
Faculty Board on results	Academic → Result Desk /results/desk , Faculty Board /results/approvals , Approval Chain, Result Pipeline	Your stage is FACULTY_BOARD : approve (to Exams & Records) or return with a reason; bulk Forward from the desk.
Broadsheet	Academic → Broadsheet /results/broadsheet	Choose programme, level, session and semester. The Examination reporting sheet (cover with summary of results, key, courses and signature blocks for Dean and Head of Department) and the sheet — every candidate across every course with CUR/CUE/WGP/GPA, cumulative figures and REMARKS in Senate's wording (PASS, CO: ..., Fail: ..., TO GO ON PROBATION, ADVISED TO WITHDRAW, PENDING, DID NOT REGISTER FOR THIS SEMESTER); from 200 Level the Direct Entry, probation and advised-to-withdraw lists. Download Excel / Download PDF (a print dialog). A mark counts once its set has reached Exams & Records or later.
Teaching allocation	Academic → Teaching Allocation /allocate	As for the HOD, across the faculty's departments.
Graduation list	Academic → Graduation List /graduation	Read the degree audit and classification summary for the faculty; the audit and Senate submission are the Academic Office's acts.
Deferments	Students → Deferments /deferments	At Department recommended: Recommend to the Registry, Request Correction or Reject; Confirm Return . Emailed "A deferment request awaits the faculty".
Faculty clearance	Students → Faculty Clearance /clearance	Sign the FACULTY unit (Clear / Hold naming the item).
Students, class lists, records	Students → Students /students , Registered Students, Records & Queries	Faculty-wide, read-only.
Postgraduate admissions	Admissions → PG Admissions /admissions/postgraduate	At Department recommended: Faculty: recommend or Decline for the faculty's programmes.
External examiners	Academic → External Examiners and the four related items	As for the HOD, with the faculty as reach.
Course spaces, score entry	Academic → Course Spaces, Upload Material, Score Entry, My Score Sheets	A Dean may act in any course space of the faculty and reads every sheet; mark entry remains the lecturer's.
Finance	Finance → Faculty Budget /finance/budget , Requisitions /finance/requisitions	Read the budget lines; raise a requisition (item, description, cost centre, value — the procurement method follows the value). Approval is the Bursary's.
Leave	(via /hr/leave)	Approve or decline leave for staff of the faculty.
Reports	Reports → Reports & Returns, Student Register, Staff Register	Cut to the faculty; Keep a copy is refused for a Dean by design.

6.3 Examinations Officer (Programme)

The Examinations Officer (exams) is a department office.

Task	Path	What you do and the rule
Verification of score sheets	Academic → Verification Queue /results/approvals , Approval Chain /results/chain	Your stage is VERIFICATION (the first desk after the lecturer): approve or return with a reason. (The screen text speaks of "the second examiner"; on the portal it is this office that acts at verification — the second examiner named at allocation gains read access only.)

Task	Path	What you do and the rule
Score entry	Academic → Score Sheets /results/sheets	You may enter and save marks on any sheet of the department and submit it, the same rules as the lecturer (§5.4), and hold scripts.
Examination sessions	Academic → CBT Sessions /examinations/sessions	Read the sessions, the submission monitor and the sheets holding the faculty. Creating, editing and opening a session is the Academic Office's and Exams & Records' act; the buttons answer 403 for this office.
Examination roll and slot	Students → Examination Roll /registration/class-list	The roll with the clearance column; Examination roll CSV; set the Examination slot (day, time, venue) per offering — this is what appears on the students' docket and card.
Result queries	Academic → Result Queries /results/queries	Answer queries on the department's courses.
Question bank	Academic → Question Bank /exams/question-bank	Per course: author multiple-choice questions (stem, at least two options, the correct one, topic, difficulty, marks), Retire / Restore , read the blueprint counts. There is no CBT examination on the portal — no test, paper or delivery; the bank is a store of questions.
External examiners	Academic → External Examiners and related	As for the HOD, department reach.
Records	Students → Records & Queries /records	Read.

6.4 Faculty Examinations Officer and Faculty Officer

Both are faculty offices bound to the faculty on their grant.

Faculty Examinations Officer (`facultyexams`): the **Scrutiny Desk** /results/desk is the home — stage **FACULTY_SCRUTINY** (after the departmental board): approve to faculty compilation or return with a reason; **Result Pipeline, Broadsheet, Approval Chain, Score Sheets** (read), **Examinations** /examinations/sessions (read) and **Records & Queries**.

Faculty Officer (`facultyofficer`):

Task	Path	What you do and the rule
Faculty compilation of results	Overview → Result Desk /results/desk ; Approval Chain, Pipeline, Broadsheet	Stage FACULTY_COMPILATION : approve to the Faculty Board or return.
Faculty list for matriculation	Students → Registered Students /matriculation → Open a faculty → /matriculation/faculty/{code}	The list is generated, never typed: every ADMITTED student of the faculty with an approved registration for the session. Per student: Query (reason and "Who clears it" — Faculty Officer, Bursary, Head of Department or Academic Office) holds the name back from the run; Withdraw query releases it. Confirm N students to the Academic Office confirms the list once ("The X list for S is already confirmed." on a second press). Export the list downloads a CSV. The run cannot start until every faculty with registered students has confirmed. The Fees column shows "—"; the run itself checks the fee position.
Deferments	Students → Deferments /deferments	Recommend at Department recommended , as the Dean does.
Students and records	Students → Students, Records & Queries	Faculty-wide, read-only.
Reports	Reports & Returns, registers	Cut to the faculty; no Keep a copy .

6.5 SIWES Coordinator

The SIWES Coordinator (`siwes`) is a department office. The home dashboard / shows the industrial-training offerings of the department for the second-semester sitting, students, and how many still have no supervisor ("N SIWES students have no supervisor" → **Assign supervisors**).

- **SIWES Supervision** /siwes : choose session, semester and the SIWES course; assign a **Supervisor** per student (searchable select of the department's lecturers); record the **Practical /60**; the **Assessment /40** is the supervisor's entry. Inputs are enabled only while the sheet is at Entry ("The SIWES score sheet is not open yet.").
- **My SIWES Students** /me/siwes : your own supervisees' assessment, if you supervise as well.
- Flagging a new course as industrial training is not done on the portal; ask the Directorate of ICT. Placement records and logbooks for SIWES are not on the portal.

6.6 Librarian and Chief Security Officer

Librarian (library):

Task	Path	What you do and the rule
Card printing	Overview → Card Printing /credentials/idcards (home)	Waiting for a card lists matriculated students without a live card (search by matriculation number or surname); Issue the card / Issue a replacement — refused "an identity card is keyed on the matriculation number, and X has none yet" or "the Bursary has not cleared this student for the identity card in {session}" (the scheme releases the card at the first instalment). Card numbers MOAUM/ID/YY/NNNNN , valid four years; Report lost via a prompt. The screen records issue only — no print job, no collection record.
Library clearance	Students → Library Clearance /clearance	Sign the LIBRARY unit: Clear or Hold naming the item (a book on loan, a fine). The student's standing (§3.16) is the evidence; the signature is manual.
Circulation	Services → Circulation /library/circulation	Issue (accession number + patron number), return (a late return posts the fine), renew, Look the patron up , waive a fine with a reason; the catalogue (add an item with its copies' accession numbers); The rule in force (loan days, fine per day, items at once, renewals — Librarian only).
Stock & acquisitions	Services → Stock & Acquisitions /stores	Not available to this office : the Stores API refuses library ; the page answers 403 unless you hold another office in its guard.
Records	Students → Records & Queries	Read.

Chief Security Officer (security): the home item **Verify a Card** has **no screen** (placeholder — there is no identity-card verification page on the portal). **Card Collection** and **Lost & Replacement** both open the same identity-card desk /credentials/idcards described above, where Security may issue and mark cards lost; the hand-over against the photograph on file is done at the desk, not recorded. **Records & Queries** is read-only. The Security dashboard shows the portal's security posture figures.

6.7 Support Services

Support Services (services) staff act as the clinic, the student-services clearance units and the hostel desk.

Task	Path	What you do and the rule
Clinic	Overview → Clinic /clinic (home)	Patient arrives : number (matriculation or admission), presenting complaint, triage (Urgent / Standard / Routine) → Add to the waiting list ; Look the patient up ; mark a booked student Arrived ; See now / Open a waiting patient (every opening is logged and shown to the student); conclude with Outcome (what the student sees), Referred to , Fitness (Fit / Fit with conditions / Unfit) and a Clinical note that never leaves the clinic. Pharmacy stock and dispensing are not on the portal.
Student clearance	Students → Student Clearance /clearance	Sign the HEALTH, HOSTEL and WORKS units (Clear / Hold naming the item). Housing also signs HOSTEL.
Hostel	Students → Hostel Accommodation /hostel	The full accommodation desk (§3.15 from the office side): state the window and rules, inventory, review applications, run the allocation, seat by hand, check in, transfer, inspect, charge, clear. The sub-screens are reached from the dashboard's buttons.

Task	Path	What you do and the rule
Help & Requests desk	/support (no menu item)	Answer students' requests addressed to Student Services: Answer and resolve or Answer, keep open . Open the address directly — the item is on no menu.
Library circulation	Services → Library Circulation /library/circulation	Issue, return, renew, catalogue (the rule itself is the Librarian's).
Requisitions, Tenders, Stores & Assets, Alumni Register	Finance → Requisitions, Tenders; Services → Stores & Assets, Alumni Register	Not available to this office: the menu lists them but the APIs refuse services ; the pages answer 403 unless you hold another office in their guards.

Note: Support Services staff act as clinicians because the portal has no separate clinician or medical office.

7 Notifications you can expect

Every notice is written to the portal's outbox and delivered by email (and SMS where marked) by the Directorate of ICT's configured provider; the same text appears on your Notifications page. Delivery state (*Sent*, *Waiting to be sent*, *Not delivered*) is shown beside each notice. If no provider is configured, notices remain "Waiting to be sent" — the portal still shows them.

7.1 Events that send a notice

Event	Who receives it	Channel	Subject
Password reset requested	the account holder	Email + SMS	"Reset your MOAUM password" (applicants: "Reset your MOAUM application password")
Payment confirmed (school fees, transcript, hostel, library fine, wallet top-up, transfer fee — any path)	student	Email + SMS	"Your payment is confirmed" / SMS "MOAUM: payment {ref} confirmed, receipt {no}."
Matriculation number issued	student	Email + SMS	"Your matriculation number"
Script held	student	Email + SMS	"Your {code} script is held until you register"
Result query answered	student	Email + SMS	"Your result query {ref} is answered"
Senate approves your award	graduand	Email + SMS	"Senate has approved your award"
Deferment: submitted, department recommended, faculty recommended, approved, rejected, correction required, cancelled, in force, ending soon, return confirmed	student	Email + SMS	"Your deferment request has been received" ... "Welcome back — your return from deferment is confirmed"
Deferment: request awaits the department / faculty / approval; a student is due to return	HOD / Dean / Academic Office / HOD	Email	"A deferment request awaits the department" etc.
Hostel: window opened; application received; review decided; bed allocated; waitlisted; hold lapsed; bed offered from the list; accepted; declined; checked in; room changed; transfer request in / refused; checkout request in; clearance started; damage charge; clearance complete or outstanding; allocation cancelled; maintenance fixed or closed	student	Email + SMS	"Hostel applications are open", "Your hostel application is in", "You have been allocated a bed", "Your hostel hold has lapsed", "You are checked in", "Your hostel clearance is complete" ...

Event	Who receives it	Channel	Subject
Hostel: application awaits review; fee confirmed; declined; transfer/checkout requested; maintenance raised	housing and services desks	Email	"A hostel application awaits review" etc.
Help & Requests answered	student	Email + SMS	"Your request {ref} has an answer" / "...is resolved"
ICT ticket: received; opened / status change; resolved; closed; desk update	requester	Email	"ICT Support Ticket Received — {n}", "Update on your ICT support ticket {n}", "Your ICT support ticket is resolved — {n}", "...is closed — {n}", "The ICT desk has an update on {n}"
ICT ticket: new ticket; assigned; escalated; reopened; requester update	agents / the agent	Email	"New ICT support ticket {n}", "Ticket assigned to you — {n}" ...
Document request: submitted; processing started; generated; QC approved / correction / rejected; released; delivered; delivery failed; cancelled; certificate issued; revoked; reissued	student (recipient for a released secure link)	Email + SMS	"Document request {ref} submitted", "Document request {ref}: your document is ready", "Your digital certificate has been issued", "A document of yours has been revoked" ...
Undergraduate applicant: account created; fee confirmed; seated; CBT schedule published / changed / withdrawn / postponed / cancelled; scores released; decision released; place held; clearance query; cleared	applicant	Email + SMS	"Your MOAUM applicant account", "Your payment receipt · RCT-...", "Your Post-UTME examination schedule", "Your screening result is released", "You have been offered provisional admission", "Your place is held", "You are cleared"
Undergraduate applicant: reconsideration suggestion	applicant	Email	"Your {session} admission — a suggested programme"
Postgraduate applicant: received; fee confirmed; School decided; decision ready to view; accepted; admitted; reference received; summary	applicant	Email	"Your MOAUM postgraduate application has been received", "A decision on your MOAUM postgraduate application", "You are admitted — your student record is open" ...
Postgraduate applicant names a referee	referee	Email	"Reference request — {applicant} (MOAUM Postgraduate)"
Postgraduate research: every stage change	student	Email	"Your research: {stage}"
External examiner: invitation; appointment; project assigned / reassigned; withdrawn; deadline changed; reminder (≤ 3 days); overdue; assessment received; reopened; locked	examiner	Email	"External Examiner Appointment — ...", "New Project Assigned for Review — ...", "Reminder: Project Review Deadline — ...", "Assessment Approved and Locked — ..."
External examiner: account activated; assessment submitted; review overdue	the desk (the inviter/assigner and the Academic Office)	Email	"External examiner account activated — {name}", "External Examiner Assessment Submitted — {number}"
Kept return emailed by an office	the addresses typed	Email	"{title} · {period} — Rev. Fr. Moses Orshio Adasu University"

7.2 Events that send nothing

These events happen silently. Look at the screen.

Event	Where to look instead
Results published by Senate	Results /student/results — the header note and "Where it is"
Course registration approved or returned	Course Registration /student/register

Event	Where to look instead
Score sheet returned to the lecturer; a sheet overdue (the Remind button answers "nothing was sent")	Score Sheets /results/sheets
Inter-departmental transfer at any stage	/student/transfer
Change of status, level correction, voluntary withdrawal	your record
Clearance hold ("Notify held candidates" is a stub)	/student/graduation
Course material published, assignment set or marked	/student/courses
Attendance recorded	/student/attendance
Identity card issued or replaced	/student/idcard
Clinic appointment, visit outcome, fitness	/student/health
Library loan, fine, reservation	/student/library
Postgraduate registration endorsed, score recorded, research document accepted or returned	/student/pg-courses , /student/research
College of Health Sciences decision, resit, graduation	/college/student
Undergraduate application submitted; offer declined; a place offered through JAMB's status list	/applicant
New PG application reaching the HOD, Dean or School; new result query reaching the department; new help request reaching an office; new hostel application when review is off	the office's desk
Leave approved or declined; payslip; staff movement	/me
Sign-in, lockout, password changed	—

8 Documents you can download

Every PDF is generated from the register at the moment you ask for it. Where a document carries a QR code or a verification code, anyone holding the paper can check it against the University's record on a public page; the table says which do.

Document	Who	Where	Available when	Verification
Payment receipt	student	/student/receipt/{reference} → Download PDF	the payment is confirmed (before: "Not confirmed")	QR + 12-character check code → /verify/receipt/{reference}? c= — "Genuine — this receipt is on the Bursary's ledger"
Course registration form	student	/student/form → Download PDF / Print	registration APPROVED	QR + check code → /verify/registration (answers only for an approved registration)
Examination card	student	/student/exams → Download exam card	approved registration and cleared for examinations under the scheme	QR + check code → /verify/exam (name, photo, courses, "Cleared" yes/no)
Statement of results (semester)	student	/student/results/{session}/{semester} → Download result slip	the semester is published and not withheld	QR + check code → /verify/results (published grades, GPA, CGPA, minute)
Result broadsheet (whole history)	student	/student/broadsheet → Print broadsheet	at least one published semester, not withheld	none

Document	Who	Where	Available when	Verification
Identity card (printable copy)	student	/student/idcard → Open the printable copy	a card is ISSUED	none — the QR on the back is the text "MOAUM ID {serial}"; there is no card-verification page
Staff identity card	staff	/me → My ID card (PDF)	a staff number is on record	none; serial and validity are computed at print, nothing is stored
Deferment approval letter	student, desks	/student/deferment → Approval Letter	the request is APPROVED (before: "The letter is issued once the deferment is approved.")	prints a QR/URL to /verify/deferment/{reference} — that page does not exist ; the link is dead
Hostel allocation letter	student	/student/hostel → Allocation letter (PDF)	the accommodation fee is confirmed	QR → /verify/hostel/{reference} (porter's check: photo, hall, room, bed, state)
Hostel clearance certificate	student	/student/hostel → Clearance certificate (PDF)	the hostel clearance is CLEARED	QR → /verify/hostel/{reference}
Degree certificate, official / sessional / mini-transcript, statement of academic record	student (and any recipient given a secure link)	/student/documents → Download PDF ; /documents/d/{token}	the document is issued (certificate: by the Registry; others: on release; self-service kinds at once)	QR + Crockford verification code and document number → /verify/document/{code} — VALID / REVOKED / REPLACED / NOT FOUND / INVALID; revoked or replaced copies print with a watermark
Transfer approval letter	student	/student/transfer → Approval letter	the transfer is EFFECTED	none; the letter's fee (¥10,000) and Senate/SAIC wording are legacy text
Application form	UG applicant	/applicant/apply → Print / Download (PDF)	after submission	none
Examination (screening) slip	UG applicant	/applicant/screening → Download slip (PDF)	seated in a published batch (before: "No examination slip yet")	QR → /verify/putme/{token} (genuine slip, batch, day, centre, seat, attendance)
Admission letter	UG applicant	/applicant/status → Print Offer Letter	the offer is accepted (undertaking + fee); before: "Accept your offer first"	none — no QR or code
Application summary	PG applicant	/pg/portal → Download / print summary (PDF)	any time after account creation	none
Confirmation of offer of admission	PG applicant	/pg/portal → Download / print offer of admission (PDF)	the acceptance fee is confirmed (before: "Offer letter not available yet")	a QR encoding the text "MOAUM PG {number}" — no verifier exists for it

Document	Who	Where	Available when	Verification
Score-sheet template / marked sheet	lecturer	/results/sheets/{id}	template: always; marked: once anything is entered	none
Class list, attendance register, examination roll	lecturer, HOD, Dean	/registration/class-list	any time	none (plain CSV)
Broadsheet (Excel / PDF)	HOD, Dean, faculty offices	/results/broadsheet	any time	none (a document serial only)
Faculty list	Faculty Officer	/matriculation/faculty/{code} → Export the list	any time	none (CSV)
Returns and registers (Excel, print)	management offices	/reports, /reports/students, /reports/staff	any time	a kept copy carries a verification code checkable at /verify/report/{code}

Branded Excel exports (returns, registers, statistics, hostel, documents office, deferment desk) put **S/N** as the first column, generated at export time, and sort names A–Z. Plain CSV exports (class lists, faculty list, examiner reports, help-desk report) do not.

9 Troubleshooting

Each entry gives the message you see, the real cause and what to do.

9.1 Cannot sign in

You see	Cause	Do
"That username and password do not match an account."	Wrong staff number/email or password; or the Registry has ended your person record.	Check the number; use Forgot your password? ; if nothing arrives, ask the Registry to reset it from Users & roles.
"That number and password do not match a student account."	Wrong matriculation/admission number or password. Before matriculation sign in with the admission number; after it, with the matriculation number. Applicants who have just been admitted use the same password as their applicant account.	Use Forgot your password? (email or phone on record needed).
"No portal account has been opened for this number yet."	A migrated student with no applicant account behind them.	The Registry opens the account from the Student record (needs a matriculation number); a migrated account may accept your own number as the first password.
"This account is locked after repeated failures; try again after HH:MM."	Five wrong passwords.	Wait fifteen minutes, or ask the Registry to reset (which clears the lock).
"The portal was updated. Sign in again." / "This session reached its end. Sign in again."	A deployment, or twelve hours passed.	Sign in again.
"The office 'x' is not one this token carries"	Your office grant ended after you signed in.	Sign out and in.

You see	Cause	Do
Signed in, but the menu is not the one you expect	You are acting as a different office.	Change Signed in as in the sidebar. A newly granted office appears only after you sign in again.
"Your examiner appointment is not active."	Examiner not activated, suspended or inactive.	Ask the desk to resend the invitation or set you active.
Reset email never arrives	No email/phone on your account, or no mail/SMS provider is configured.	Students: add a personal email under Profile once you can sign in; otherwise ask the Registry.

9.2 Cannot register courses

You see	Cause	Do
"the first semester school fees for ... are not fully paid"	The semester's charge is not settled in full.	Pay on School Fees — Pay First ; the position updates the moment the payment is confirmed.
"Arrears from an earlier session stand against you"	An earlier session's charge exceeds its payments.	Settle the arrears (the Bursary can also import old payments).
"the registration carries N units; at L level the range is A to B"	Below the minimum or over the maximum.	Add or drop electives. There is no overload approval on the portal.
"REGISTRATION UNAVAILABLE: your deferment for ... is approved"	An approved or active deferment covers the period.	Withdraw the deferment (before it is in force) or wait for the return session.
"A student who is ... does not register."	Status is not ADMITTED/ACTIVE/PROBATION (deferred, suspended, withdrawn...).	The Registry changes status on an instrument.
"No core course is offered to your programme this semester yet"	Registration has not been opened for the session/semester, or the structure is empty.	Ask your department / the Directorate of ICT.
No courses at all, or the wrong ones	Curriculum track mismatch (CCMAS vs BMAS), or your programme changed after a transfer.	Ask your department to check the course tagging; after a transfer the new programme's courses appear when its registration is next opened.
"add and drop is not open for ..."	The semester is not open or the late-registration date passed.	Nothing until the calendar allows it.
Returned by the HOD	The reason is on the screen.	Edit and Submit for approval again.

9.3 Payment not showing

You see	Cause	Do
Reference still Awaiting confirmation after a card payment	The gateway's callback has not reached the portal yet; a sweep re-checks hanging payments every ten minutes.	Return to the Fees page (it verifies on load), or press I've paid — check now .
"Not confirmed yet" after PayDirect	The collection has not reached the University.	Wait a few minutes and check again; the Bursary can also import the collections report.
Reference Expired	24 hours passed unconfirmed.	Generate a new reference. If you paid at a bank against the expired reference, the Bursary confirms it against the bank record.
Paid at a bank, nothing on the portal	The Bursary has not yet confirmed the bank credit (two officers are involved).	Raise a Help & Request to the Bursary with the teller details, or a PAYMENT ticket.
Paid less than the reference	The gateway reports SHORT_PAID; nothing is confirmed.	Contact the Bursary; a part payment is applied against a reference generated for the part.

You see	Cause	Do
Hostel bed "hold lapsed before the payment arrived"	The 72-hour hold expired before the payment reached the portal and the bed went to the next name.	The Bursary applies or refunds the money; the desk seats you in a free bed.

9.4 Cannot download a document

You see	Cause	Do
Course form: "The course form is issued when your registration is approved"	Not yet approved.	Wait for the HOD.
Exam card: "No approved registration" / "Not cleared for examinations"	No approved registration, or the scheme's examination release (payment in full) not met.	Register / pay.
Result slip: "Nothing published" / "Withheld"	Semester not published, or results withheld for fees.	Wait / pay.
Identity card: "No identity card issued"	The Library has not issued the card (needs matriculation and the ID_CARD release).	See §3.17.
Receipt: "Not confirmed"	Payment unconfirmed.	See §9.3.
Deferment letter: "The letter is issued once the deferment is approved."	Not yet approved.	Wait for the Registry.
Hostel letter: "The letter is issued once the accommodation fee is confirmed."	Fee unconfirmed or the allocation lapsed/declined.	Pay / ask the desk.
Transcript request stuck at "Payment pending" / "Held at clearance"	Fee unpaid; or a unit (Bursary, Library, department) holds you on the TRANSCRIPT clearance.	Pay the reference; clear the unit named on your clearance screen.
PG offer letter: "Offer letter not available yet"	The acceptance fee is not confirmed (even if the desk recorded acceptance).	Pay the acceptance fee.
Admission letter: "Accept your offer first"	Undertaking or acceptance fee outstanding.	Complete both.
Secure link "expired" / "used the permitted number of times"	Seven days or the use limit passed.	Make a new secure link from My Documents; the document still verifies by its code.

9.5 Result not showing

You see	Cause	Do
"Where it is" shows a desk, no mark	The sheet is still in the approval chain; only Senate's minute publishes.	Wait; no notice is sent on publication — check again.
"Your results are withheld until your fees are settled"	The scheme releases results on payment in full.	Pay.
"Nothing is registered against you yet"	No approved registration for the session.	Register.
A course shows F/ABS you did not expect	On a published sheet a missing score or Absent counts as F; or your script was held and lapsed.	Raise a Result Query within seven days of publication.
Query answered <i>Corrected</i> but the mark is unchanged	No correction path exists on the portal for a published sheet.	The Registry handles corrections outside the portal.

9.6 Matriculation number not generated

Cause	Do
School fees for the session of entry not paid in full (the faculty list's "Fees" column shows "—" and does not tell you).	Pay in full.
Course registration not approved.	Get the registration approved.

Cause	Do
Your name is under query on the faculty list.	The office named in the query ("Who clears it") must withdraw it.
The faculty list is not confirmed, or another faculty's is not ("the run cannot start: ... has not confirmed its list").	The Faculty Officers confirm; the Academic Office runs.
"the matriculation number cannot be built: Programme ... is configured to carry a code but has none"	A configuration gap on the Registry's format screen; the whole run rolls back until it is fixed.
You paid and registered after the run.	The Academic Office issues a single number ("Issue number" on the faculty list).

9.7 Hostel application refused

You see	Cause	Do
"Accommodation for {session} is not open yet"	No window stated.	Wait for the housing desk.
"You are not eligible to apply this session" + reason	Status, level or faculty outside the window's rules; course registration not submitted; an unsettled damage charge; a previous stay not cleared; still checked in elsewhere.	Fix the record (pay the charge, complete the previous clearance, register) or ask the desk.
"an application for ... already stands"	One application per session.	Withdraw it before making another.
"the application window for ... is full"	Maximum applications reached.	Wait for the waiting list.
Roommate refused ("No student carries the number X." / "...shares the sex restriction" / "...is not eligible")	Wrong number or an incompatible roommate.	Correct or leave blank.
Cannot press Pay	The allocation is not HELD (lapsed, declined or cancelled).	Ask the desk to seat you by hand in a free bed.
"the hostel rules (version N) are acknowledged before the allocation is accepted"	The rules changed after your page loaded.	Reload and accept again.

9.8 Ticket or request not answered

Situation	Cause	Do
Ticket still <i>Submitted</i>	No agent has opened it yet; an agent opens it by reading it. Priority and SLA are set by the category.	Add an update on the ticket; the assigned agent (or the desk) is emailed. Track it publicly at <code>/track</code> with the number and your email.
Ticket <i>Resolved</i> but not what you needed	—	Reopen Ticket with a reason of at least five characters.
Cannot raise a ticket: "ten tickets are open already"	Ten open tickets.	Close or confirm one.
Attachment refused	Not PDF/JPEG/PNG, over 5 MB, or the file's content does not match its name.	Convert and retry.
Help & Request unanswered for long	The office's desk (<code>/support</code>) is not on any office menu; requests to the Deputy Registrar cannot be addressed at all.	Raise a ticket for portal matters, or contact the office directly quoting the SR reference.
"five requests are open already"	Five open requests.	Wait for an answer.

10 Frequently asked questions

- 1. Which number do I sign in with?** Staff: your staff number (or the email the Registry set as username). Students: the admission number `MOAUM/ADM/YY/NNNNNN` until you are matriculated, then the matriculation number. Undergraduate applicants: the JAMB registration number. Postgraduate applicants: the email address or `PG/YY/NNNNNN`. External examiners: the email address.
- 2. I was an applicant; do I need a new password as a student?** No. Your applicant password carries over on your first sign-in as a student. A postgraduate applicant's password carries over too.
- 3. How long am I signed in?** Twelve hours, or until the portal is redeployed, whichever comes first.
- 4. Why does the sign-in page say I look like a member of staff when I type my matriculation number?** The hint uses an older number pattern. It is cosmetic; you are still signed in as a student.
- 5. Where do I see what the portal sent me?** Students: Account → Notifications. Staff: `/me/notices`. Applicants: the dashboard's "Notices sent to you".
- 6. Why did I not get an email when my results were published / my registration was approved?** Because the portal sends nothing on those events. Check the screen. Section 7.2 lists every silent event.
- 7. How is my fee worked out?** From the Bursary's fee schedule for your level, entry mode, faculty, programme and indigene status, as the semesters open. Nobody types an amount against you.
- 8. Can I pay part of the fee?** Yes — a semester at a time (the first semester releases first-semester registration). The examination, results and transcript wait on the session paid in full under the current scheme.
- 9. My payment reference expired. Did I lose money?** No. A reference is a number, not a payment. Generate a new one; if you paid at a bank against the old one, the Bursary confirms it against the bank's record.
- 10. Can I choose more units than the maximum with my HOD's permission?** Not on the portal. The hint mentions an overload approval, but no such mechanism exists; keep within the range.
- 11. What does "Returned to you" on my registration mean?** Your Head of Department sent it back with the reason shown. Change what is asked and submit again.
- 12. When will I get my matriculation number?** After your fees for the entry session are paid in full, your registration is approved, your faculty's list is confirmed and the Academic Office runs matriculation. You are emailed and texted the number. It never changes.
- 13. What do MOAU/AD/ACC/26/13567 and MOAU/LAW/26/85632 mean?** University code / faculty segment / programme code (only where the programme carries one) / year of entry / sequence in the faculty's or programme's series.
- 14. What is the difference between the statement of results, the broadsheet and a transcript?** The statement is one semester's published results with a QR (from Results). The broadsheet is your whole history for your own use, no QR. A transcript is an official document requested under My Documents, numbered, verifiable by code, and released by the Registry (full and sessional transcripts are paid; the mini-transcript and statement of academic record are free and instant).
- 15. The Results screen has an "Official transcript" button that does nothing.** It is a stale placeholder. Use Academic → My Documents.
- 16. How long do I have to query a mark?** Seven calendar days from publication, one mark in one course per query. The answer comes by email and SMS. A "Corrected" answer does not by itself change the published mark on the portal.
- 17. Why can't I see my course space?** Your registration is not approved yet, or the lecturer has not published anything.
- 18. Who approves a deferment and how long does it take?** Bursary → HOD → Faculty → Academic Office → DVC (final). You are told at each turn; once approved, a daily clock brings it into force on its start date.
- 19. Can I defer before I am matriculated?** No: "Deferment is asked for once you are matriculated".
- 20. I was allocated a hostel bed but did not pay in time.** The hold lapsed (72 hours by default) and the bed passed to the next name. Ask the housing desk to seat you by hand in a free bed if any remains.
- 21. Can anyone check my receipt / course form / certificate is real?** Yes. Each carries a QR or a code and a public page (`/verify/...`) that reads the University's record. The deferment letter's link and the PG offer letter's QR are exceptions — they cannot be verified online yet; the identity card has no verification page.
- 22. As a lecturer, why is there no sheet for my course?** Either the HOD has not allocated you, or the Academic Office has not opened the examination session. Both are needed.

23. **I saved a wrong mark. How do I change it?** You cannot on your own: submit and ask the Examinations Officer or HOD to return the sheet with a reason; then amend the row with a reason.
 24. **Where do I find my payslip?** Me → Leave & Payslip; approved or paid runs only, on screen (no PDF).
 25. **What is the ICT ticket number format and can I track it without signing in?** TICK-YYYY-NNNNN ; yes, at /track with the number and the email on the ticket.
-

11 Quick starts

11.1 New student — first ten things

1. Sign in at /login with your admission number and your applicant password (or the first password the Registry gave you, then choose your own).
2. Open **Profile** and add a personal email and phone — resets and notices go there.
3. Read the **Dashboard** fee-gate note; open **School Fees — Pay First**.
4. Generate a reference for the first semester (or the full session) and pay by card/USSD, PayDirect or at a bank quoting the reference.
5. When "Your payment is confirmed" arrives, download the **Receipt**.
6. Open **Course Registration**, tick your electives until the meter reads *Valid*, **Save the draft**, **Submit for approval**.
7. Check back for "Approved on ..." (no email comes); download the **Course form**.
8. Wait for "Your matriculation number" by email/SMS; from then on sign in with it.
9. Visit **Identity Card** once the Library has issued your card; download the printable copy.
10. Bookmark **Notifications**, **Results** and **Help & Requests / ICT Support Tickets** for the session.

11.2 New lecturer — first ten things

1. Sign in with your staff number and the first password (P<PNO> if you were loaded from the nominal roll); choose your own password on **Your password**.
2. Check **Signed in as** shows *Lecturer* (switch if you also hold HOD or another office).
3. Open **My Profile** and upload a photograph, your contact details and your research lists.
4. Open **My Courses & Timetable**; if empty, ask your HOD to allocate your courses on Teaching Allocation.
5. On **Registered Students** set your **Timetable slots** and start recording **Attendance**.
6. Open **Course Spaces** and publish your first material; set assignments with their CA weight.
7. When the examination session opens, download the **Score Sheet** template from the dashboard.
8. Enter or upload marks on /results/sheets/{id} ; give every candidate a mark or an outcome; **Submit and attest**.
9. Hold any script from a candidate not on the roll under **Scripts from candidates not on the roll**.
10. Track the sheet's stage on the dashboard; answer any **Result queries** on your courses within the department's desk.

11.3 New applicant — first ten things (undergraduate)

1. Open /apply , type your JAMB registration number and wait for "Found on the UTME/Direct Entry list".
2. Give an email you read, a Nigerian phone number and a password of eight characters or more; **Continue**.
3. On **Application Fee**, generate the reference and pay; wait for "Payment confirmed".
4. On **Application Form**, enter your next of kin, check the biodata and O'Level results JAMB sent, tick the declaration and **Submit application**.
5. Download the application form PDF for your records.
6. Watch **Screening Slip**; when the schedule is published, download the slip and note the reporting time, centre, room and seat.
7. Sit the examination with the slip and an identification document.
8. Read **Screening Result** when released, then **Admission Status** when the decision is released.
9. If offered: on **Accept Your Offer** sign the undertaking and pay the acceptance fee; print the offer letter.

10. Present your six originals at the Registry for clearance; when your admission number appears on **Matriculation**, sign in as a student and follow §11.1.

(A postgraduate applicant: apply at [/pg/apply](#), pay the application fee, complete academic record, referees, documents and passport, pay the checking fee to read the decision, pay the acceptance fee to accept, then sign in as a student with the admission number.)
