

MOAUMPP demo accounts

Rev. Fr. Moses Orshio Adasu University, Makurdi - Unified University Portal. Invented people, for walking the portal. Nobody here is real: every surname is DEMO, every staff number is MOAUM/DEMO/nnn, the matriculation numbers sit at 9901-9906 so a real matriculation run never meets them, and the demo courses carry the DMO prefix.

Put them on a database from the Railway shell of the moaum-api service, once: `bash db/demo.sh` (a second run changes nothing).

Password for every account: Demo password 2026

Everybody signs in at the one door, /login, with the number below. The portal reads the number, signs the person in on their own side, and opens their dashboard. Portal:

The applicant is on a demo CAPS list for B.Sc. Computer Science with a UTME aggregate of 250.

What is already set up for the walk

- Five demo courses at 300 level (DMO 311 to DMO 351), offered this session in the first semester, taught by demo.lecturer with demo.exams as second examiner.
- The 300-level student is registered and approved on all five.
- The examination session is open, so five score sheets sit at entry with the lecturer.
- A fee schedule for the session and the recommended clearance scheme are in force, so the student screens have something to say.

The lecturer's results path, desk by desk

Step	Sign in as	What to do
1	demo.lecturer	Score sheets ? open DMO 311 ? enter CA and exam marks ? Submit and attest
2	demo.exams	Result desk ? verify the sheet
3	demo.hod	Result desk ? approve at the Departmental Board
4	demo.facultyexams	Result desk ? scrutiny; then demo.facultyofficer ? compilation
5	demo.dean	Result desk ? Faculty Board

7	demo.registrar	Senate ? record the minute and release
8	MOAUM/MTC/24/9903	Results: the published sheet, and the query window

No two consecutive desks may be taken by one person, so the walk needs the accounts above, not one account holding every office.
